Medicine Meets Virtual Reality 13 James D. Westwood, 2005 Magical describes conditions that are outside our understanding of cause and effect Even in modern societies magic based explanations are powerful because given the complexity of the universe there are so many opportunities to use them The history of medicine is defined by progress in understanding the human body from magical explanations to measurable results To continue medical progress physicians and scientists must openly question traditional models For thirteen years MMVR has been an incubator for technologies that create new medical understanding via the simulation visualization and extension of reality Researchers create imaginary patients because they offer a more reliable and controllable experience to the novice surgeon With imaging tools reality is purposefully distorted to reveal to the clinician what the eye alone cannot see Robotics and intelligence networks allow the healer s sight hearing touch and judgment to be extended across distance as if by magic The moments when scientific truth is suddenly revealed after lengthy observation experimentation and measurement is the real magic These moments are not miraculous however book

*Integrative Production Technology for High-Wage Countries* Christian Brecher, 2011-12-17 Industrial production in high-wage countries like Germany is still at risk. Yet there are many counter-examples in which producing companies dominate their competitors by not only compensating for their specific disadvantages in terms of factor costs (e.g. wages, energy, duties and taxes) but rather by minimising waste using synchronising integrativity as well as by obtaining superior adaptivity on alternating conditions. In order to respond to the

issue of economic sustainability of industrial production in high wage countries the leading production engineering and material research scientists of RWTH Aachen University together with renowned companies have established the Cluster of Excellence Integrative Production Technology for High Wage Countries This compendium comprises the cluster s scientific results as well as a selection of business and technology cases in which these results have been successfully implemented into industrial practice in close cooperation with more than 30 companies of the industrial production sector
