Geography Grade 11 Research Project:

Research in Education, 1974 **Resources in Education**, 1997 *Perspectives of Black Histories in Schools*
LaGarrett J. King, 2019-11-01 Concerned scholars and educators since the early 20th century have asked questions regarding the viability of Black history in K-12 schools. Over the years we have seen K-12 Black history expand as an academic subject which has altered research questions that deviate from whether Black history is important to know to what type of Black history knowledge and pedagogies should be cultivated in classrooms in order to present a more holistic understanding of the group's historical significance. Research around this subject has been stagnated typically focusing on the subject's tokenism and problematic status within education. We know little of the state of K-12 Black history education and the different perspectives that Black history encompasses. The book *Perspectives on Black Histories in Schools* brings together a diverse group of scholars who discuss how K-12 Black history is understood in education. The book's chapters focus on the question what is Black history and explores that inquiry through various mediums including its foundation, curriculum, pedagogy, policy, and psychology. The book provides researchers, teacher educators, and historians an examination into how much K-12 Black history has come and yet how long it still needed to go. **Reader's Guide to Periodical Literature Supplement**, 1928
Educational Research Bulletin, 1929 Includes the sections Educational readings and Books to read *Educational Research Document Summaries* Educational Research Information Center (U.S.), 1966 *The Influence of Kindergarten Attendance on Progress in Grade I*. Josephine MacLatchy, 1924 **Catalog** State Teachers College at Bridgewater (Mass.), 1919 **History Education 101** Wilson J. Warren, D. Antonio Cantu, 2008-01-01 Historians and teacher educators nationwide are now engaged in discussions about the importance of history teacher preparation. Interest within the history profession about the teaching of K-12 history has increased significantly during the past two decades, particularly since the controversy over the National Standards for History's publication. This attention is evident not only in the historical professions' various publications but also in the federal government's multi-million dollar Teaching American History Program and the No Child Left Behind Act. Professional historians are increasingly committed to improving the teaching of history at the K-12 level through many forms of collaboration. *History Education 101*'s thirteen essays are organized into three sections: context, practice, and new directions. The essays' contributors, tenured faculty who teach history teaching methods courses in colleges and universities throughout the United States, focus on how history education has is and will be taught to new K-12 teachers throughout the United States. Perhaps more than ever, it is critical for Americans to understand the role of higher education in the preparation of future middle and high school history teachers. This book provides important insights for academics in history and education departments as well as other individuals who are concerned with the status and improvement of history teaching in the schools, particularly current and future elementary and secondary teachers and administrators. **New Society**, 1974
