The Unions' Response to Globalization Gary Chaison, 2014-07-08 Globalization is commonly described in trade and cultural terms but its impact on unions and collective bargaining is seldom assessed The few studies of unions and globalization are mostly collections of cases studies of how unions can work together or with other alliance partners to defend against the power of multinational corporations This book goes beyond the current research by asking how unions have tried to deal with globalization and how globalization might threaten the fundamental union mission of taking wages hours and conditions of employment out of competition The introductory chapter defines globalization and uses the case of the Detroit Three automakers GM Chrysler and Ford to show how globalization can affect employment and union size influence and relevancy The second chapter shows how unions deal globalization through collective bargaining regarding outsourcing alliances strikes and political action including lobbying and international work standards The final chapter argues that the unions cannot continue unchanged in this age of globalization and asks what they must do to be effective and relevant

Placing the Border in Everyday Life Reece Jones, Corey Johnson, 2016-04-22 Bordering no longer happens only at the borderline separating two sovereign states but rather through a wide range of practices and decisions that occur in multiple locations within and beyond the state s territory Nevertheless it is too simplistic to suggest that borders are everywhere since this view fails to acknowledge that particular sites are significant nodes where border work is done Similarly border work is more likely to be done by particular people than others This book investigates the diffusion of bordering narratives and practices by asking who borders and how *Placing the Border in Everyday Life* complicates the connection between borders and sovereign states by identifying the individuals and organizations that engage in border work at a range of scales and places This edited volume includes contributions from major international scholars in the field of border studies and allied disciplines who analyze where and why border work is done By combining a new theorization of border work beyond the state with rich empirical case studies this book makes a ground breaking contribution to the study of borders and the state in the era of globalization

The Human City Joel Kotkin, 2016-04-12 The author of *The Coming of Neo Feudalism* and *The New Class Conflict* challenges conventions of urban planning Around the globe most new urban development has adhered to similar tenets tall structures small units and high density In *The Human City* Joel Kotkin called America s uber geographer by David Brooks of the New York Times questions these nearly ubiquitous practices suggesting that they do not consider the needs and desires of the vast majority of people Built environments Kotkin argues must reflect the preferences of most people even if that means lower density development *The Human City* ponders the purpose of the

city and investigates the factors that drive most urban development today Armed with his own astute research a deep seated knowledge of urban history and a sound grasp of economic political and social trends Kotkin pokes holes in what he calls the retro urbanist ideology and offers a refreshing case for dispersion centered on human values This book is not anti urban but it does advocate a greater range of options for people to live the way they want at all stages of their lives Praise for The Human City Kotkin presents the most cogent evidence based and clear headed exposition of the pro suburban argument In pithy readable sections each addressing a single issue he debunks one attack on the suburbs after another But he does more than that He weaves an impressive array of original observations about cities into his arguments enriching our understanding of what cities are about and what they can and must become Shlomo Angel Wall Street Journal The most eloquent expression of urbanism since Jane Jacobs s The Death and Life of Great American Cities Kotkin writes with a strong sense of place he recognizes that the geography and traditions of a city create the contours of its urbanity Ronnie Wachter Chicago Tribune

across the globe Our information age creates new and more integrated forms of communication that incur risks that are difficult to evaluate let alone anticipate All of this makes clear that innovative approaches to assessing and managing risk are urgently required When catastrophic risk management was in its inception thirty years ago scientists and engineers would provide estimates of the probability of specific types of accidents and their potential consequences Economists would then propose risk management policies based on those experts estimates with little thought as to how this data would be used by interested parties Today however the disciplines of finance geography history insurance marketing political science sociology and the decision sciences combine scientific knowledge on risk assessment with a better appreciation for the importance of improving individual and collective decision making processes The essays in this volume highlight past research recent discoveries and open questions written by leading thinkers in risk management and behavioral sciences The Future of Risk Management provides scholars businesses civil servants and the concerned public tools for making more informed decisions and developing long term strategies for reducing future losses from potentially catastrophic events Contributors Mona Ahmadiani Joshua D Baker W J Wouter Botzen Cary Coglianese Gregory Colson Jeffrey Czajkowski Nate Dieckmann Robin Dillon Baruch Fischhoff Jeffrey A Friedman Robin Gregory Robert W Klein Carolyn Kousky Howard Kunreuther Craig E Landry Barbara Mellers Robert J Meyer Erwann Michel Kerjan Robert Muir Wood Mark Pauly Lisa Robinson Adam Rose Paul J H Schoemaker Paul Slovic Phil Tetlock Daniel V stfj ll W Kip Viscusi Elke U Weber Richard Zeckhauser Global Sustainability, Cultural Perspectives and Challenges for Transdisciplinary Integrated Research Benno Werlen, 2015-05-28 This book offers new perspectives of transdisciplinary research in methodological as well as theoretical respects It provides insights in the two fold bio physical and the socio cultural global embeddedness of local living conditions on the basis of selected empirical studies from Latin America Asia Africa Australia and Europe The theoretical foundations of ecological research and sustainability policies were developed at the end of the nineteenth century They are largely based on investigations of living spaces and the evolution and differentiation of varied life forms This perspective is embedded in the practical and theoretical European problem situations of the past and lacks social and cultural differentiation The transformation of spatial and natural relations as a result of the globalization process is so radical that new theories are needed to solve 21st century ecological problems Moreover in view of the lack of an ontologically sound and promising strategy for transdisciplinary problem solving as well as an acceptable consideration of the power of cultural schemas relating to natural living s interpretations there is a strong need to focus on sustainable social practices habits and routines rather than on predominantly living spaces or eco topes This book elaborates on the transdisciplinary approach by reflecting on the theoretical heritage and a global perspective of sustainability by focusing on the primary role of a social approach in sustainability research and by putting emphasis on cultural dimension of sustainability It postulates that global sustainability is grounded in a global understanding of our everyday activities International Entrepreneurship in Emerging Markets
