The Places and Spaces of News Audiences Chris Peters, 2018-04-19 Historically or so we would like to believe the story of everyday life for many people included regular definitive moments of news consumption Journalism in fact was distributed around these routines papers were delivered before breakfast the evening news on TV buttressed the transition from dinner to prime time programming and radio updates were centred around commuting patterns These habits were organized not just around specific times but occurred in specific places following a predictable pattern However the past few decades have witnessed tremendous changes in the ways we can consume journalism and engage with information from tablets to smartphones online and so forth and the different places and moments of news consumption have multiplied as a result to the point where news is increasingly mobile and instantaneous It is personalized localized and available on demand Day by day month by month year by year technology moves forward impacting more than just the ways in which we get news These fundamental shifts change what news is This book expands our understanding of contemporary news audiences and explores how the different places and spaces of news consumption change both our experiences of journalism and the roles it plays in our everyday lives This book was originally published as a special issue of Journalism Studies      **The 3-D Global Spatial**

**Data Model** Earl F. Burkholder, 2008-04-15 Traditional methods for handling spatial data are encumbered by the assumption of separate origins for horizontal and vertical measurements Modern measurement systems operate in a 3 D spatial environment The 3 D Global Spatial Data Model Foundation of the Spatial Data Infrastructure offers a new model for handling digital spatial data the global spatial data model or GSDM The GSDM preserves the integrity of three dimensional spatial data while also providing additional benefits such as simpler equations worldwide standardization and the ability to track spatial data accuracy with greater specificity and convenience This groundbreaking spatial model incorporates both a functional model and a stochastic model to connect the physical world to the ECEF rectangular system Combining horizontal and vertical data into a single three dimensional database this authoritative monograph provides a logical development of theoretical concepts and practical tools that can be used to handle spatial data more efficiently The book clearly describes procedures that can be used to handle both ECEF and flat Earth rectangular components in the context of a rigorous global environment      *Porting to the Symbian Platform* Mark Wilcox, 2009-09-10 If you want to write mobile applications without
