Intermediate Microeconomics Steve Erfle, 2017-09-14 The overarching premise of this text is that microeconomics is most effectively learned in an active learning interactive environment Students have access to more than 200 Interactive Excel Figures in the online text that allow them to move the graphs using sliders and click boxes This interactivity helps students understand how graphic elements relate to one another These files do not require knowledge of Excel More figures than are typical and many of the figures involve multiple scenarios of the same basic graph Often the text employs interactive questions that require interpreting these scenarios questions posed are answered at the bottom of the page Despite the geometric orientation this text is not light on algebraic analysis The geometry is backed up by the relevant algebra More than 500 equations are numbered for easy reference both within and across chapters And just like the geometry the algebra is essentially error free because it was used to create the graphs The geometric orientation is perfect for the non calculus enhanced classroom but the text can be readily used in a calculus based class because a calculus treatment of the material is provided in appendices and endnotes and calculus based problems are included in the Intermediate Microeconomics An Interactive Approach Workbook Resources in Education ,1999-04 Technology-Supported Teaching and Research Methods for Educators Makewa, Lazarus Ndiku, Ngussa, Baraka Manjale, Kuboja, Joshua Michael, 2018-09-28 Technology can be a powerful tool for transforming learning It can help affirm and advance relationships between educators and students reinvent approaches to learning and collaboration shrink long standing equity and accessibility gaps and adapt learning experiences to meet the needs of all learners Technology Supported Teaching and Research Methods for Educators provides innovative insights into the utilization and maintenance of technology supported teaching and research methods for educators The content within this publication represents the work of e learning digital technologies and current issues and trends in the field of teaching and learning in the context of contemporary technologies It is a vital reference source for school educators professionals school administrators academicians researchers and graduate level students seeking coverage on topics centered on the integration of effective technologies that will support educators and students *Public Economics I* ,1995 Research in Education ,1974 *Research Anthology on Developing Effective Online Learning Courses* Management Association, Information Resources, 2020-12-18 In the current educational environment there has been a shift towards online learning as a replacement for the traditional in person classroom experience With this new environment comes new technologies benefits and challenges for providing courses to students through an entirely digital environment With this shift comes the necessary research on how to utilize these online courses and how to develop effective online educational materials that fit student needs and encourage student learning motivation and success The optimization of these online tools requires a deeper look into curriculum instructional design teaching techniques and new models for student assessment and evaluation Information on how to create valuable online course content engaging lesson plans for the digital
