The Schenley Experiment Jake Oresick, 2017-04-14 The Schenley Experiment is the story of Pittsburgh's first public high school a social incubator in a largely segregated city that was highly even improbably successful throughout its 156 year existence Established in 1855 as Central High School and reorganized in 1916 Schenley High School was a model of innovative public education and an ongoing experiment in diversity Its graduates include Andy Warhol actor Bill Nunn and jazz virtuoso Earl Hines and its prestigious academic program and pensions lured such teachers as future Pulitzer Prize winner Willa Cather The subject of investment as well as destructive neglect the school reflects the history of the city of Pittsburgh and provides a study in both the best and worst of urban public education practices there and across the Rust Belt Integrated decades before Brown v Board of Education Schenley succumbed to default segregation during the white flight of the 1970s it rose again to prominence in the late 1980s when parents camped out in six day long lines to enroll their children in visionary superintendent Richard C Wallace's reinvigorated school Although the historic triangular building was a cornerstone of its North Oakland neighborhood and a showpiece for the city of Pittsburgh officials closed the school in 2008 citing over 50 million in necessary renovations a controversial event that captured national attention Schenley alumnus Jake Oresick tells this story through interviews historical documents and hundreds of first person accounts drawn from a community indelibly tied to the school A memorable important work of local and educational history his book is a case study of desegregation magnet education and the changing nature and legacies of America's oldest public schools

Drawing for Science Education Phyllis Katz, 2017-03-23 This book argues for the essential use of drawing as a tool for science teaching and learning The authors are working in schools universities and continual science learning CSL settings around the world They have written of their experiences using a variety of prompts to encourage people to take pen to paper and draw their thinking sometimes direct observation and in other instances their memories The result is a collection of research and essays that offer theory techniques outcomes and models for the reader Young children have provided evidence of the perceptions that they have accumulated from families and the media before they reach classrooms Secondary students describe their ideas of chemistry and physics Teacher educators use drawings to consider the progress of their undergraduates understanding of science teaching and even their moral ethical responses to teaching about climate change Museum visitors have drawn their understanding of the physics of how exhibit sounds are transmitted A physician explains how the history of drawing has been a critical tool to medical education and doctor patient communications Each chapter contains samples insights and where applicable analysis techniques The chapters in this book should be helpful to researchers and teachers alike across the teaching and learning continuum The sections are divided by the kinds of activities for which drawing has historically been used in science education An instance of observation Audubon Linnaeus A process how plants grow over time what happens when chemicals combine Conceptions of what science is and who does it Images of identity development

in science teaching and learning *ICTES 2018* Robbi Rahim, Kadek Suranata, Ifdil Ifdil, Itsar Bolo Rangka, 2019-03-13 The technical program of The First ICTES 2018 consisted of 114 full papers. Aside from the high quality technical paper presentations, we also held workshop and clinic manuscript that was carried out before the main track aims to strengthen the ability to write scientific publications. Coordination with the steering chairs Dr Kadek Suranata S Pd M Pd Kons and the members of organizing committee is essential for the success of the conference. We sincerely appreciate all the Advisory Boards for the constant support and guidance. It was also a great pleasure to work with such an excellent organizing committee team for their hard work in organizing and supporting the conference. In particular, the Scientific Committee led by Cand Dr Robbi Rahim M Kom have completed the peer review process of technical papers and made a high quality technical program. We are also grateful to Students Conference chairs were leading by Ida Ayu Made Diah Paramiswari for their support and all the authors who submitted their papers to the First ICTES 2018. We strongly believe that ICTES conference provides a good forum for all academicians, researchers and practitioners to discuss all Educational science and technology aspects that are relevant to issues and challenge for sustainability in the 4th industrial revolution. We also expect that the future ICTES conference will be as successful and stimulating as indicated by the contributions presented in this volume.

All the Rage Virginia Nicholson, 2024-08-06 A panoramic social history that chronicles the quest for beauty in all its contradictions and how it affects the female body. Who decides what is fashionable? What clothes we wear, what hairstyles we create, what colour lipstick we adore, what body shape is all the rage? The story of female adornment from 1860-1960 is intriguingly unbuttoned in this glorious social history. Virginia Nicholson has long been fascinated by the way we women present ourselves or are encouraged to present ourselves to the world. Women have been fat or slim, hyperthyroid or splenetic, sallow or pink, cheeked, slouched or erect according to the prevalent notions of beauty. Cecil Beaton *The Glass of Fashion* 1954. In this book we learn about rational dress, suffragettes, hats, the Marcel wave, the Gibson Girls corsets and the banana skirt. At the centre of this story is the female body in all its diversity: fat, thin, short, tall, brown, white, black, pink, smooth, hairy, wrinkly, youthful, crooked or symmetrical and relevant as ever. In this context, the vexed issues of body image and bodily autonomy. We may even find ourselves wondering whose body it is. In the hundred years this book charts, the western world saw the rapid introduction of new technologies like photography, film and eventually TV which for better and worse thrust women and female imagery out of the private and into the public gaze.

New Educational Technologies and Their Impact on Students' Well-being and Inclusion Process Maria Luisa Lorusso, Daniela Traficante, Mirta Vernice, Barbara Carretti, Daniela Maria Sarti, 2022-01-13 **Follow the Money** Sarah Reckhow, 2013-01-17 Some of the nation's wealthiest philanthropies including the Bill and Melinda Gates Foundation, the

Walton Family Foundation and the Broad Foundation have invested hundreds of millions of dollars in education reform. With vast wealth and a political agenda, these foundations have helped to reshape the reform landscape in urban education. In *Follow the Money*, Sarah Reckhow shows where and how foundation investment in education is occurring and presents an in-depth analysis of the effects of these investments within the two largest urban districts in the United States: New York City and Los Angeles. In New York City, centralized political control and the use of private resources have enabled rapid implementation of reform proposals. Yet this potent combination of top-down authority and outside funding also poses serious questions about transparency, responsiveness, and democratic accountability in New York. Furthermore, the sustainability of reform policies is closely linked to the political fortunes of the current mayor and his chosen school leader. While the media has highlighted the efforts of drastic reformers and dominating leaders such as Joel Klein in New York City and Michelle Rhee in Washington D.C., a slower but possibly more transformative set of reforms have been taking place in Los Angeles. These reforms were also funded and shaped by major foundations but they work from the bottom up through charter school operators managing networks of schools. This strategy has built grassroots political momentum and demand for reform in Los Angeles that is unmatched in New York City and other districts with mayoral control. Reckhow's study of Los Angeles's education system shows how democratically responsive urban school reform could occur, pairing foundation investment with broad grassroots involvement. Bringing a sharp analytical eye and a wealth of evidence to one of the most politicized issues of our day, *Follow the Money* will reshape our thinking about educational reform in America. *U. S. News and World Report Ultimate College Guide* U.S. News & World Report (Firm), 2007-10. In the simplest of terms, leadership is about influencing people to achieve an objective that is important to the leader, the group, and the organization. It is the human element leading, motivating, and inspiring, particularly during times of crisis, chaos, and complexity, when directives, policy statements, and communiques have little effect on cold, exhausted, and stressed followers. Strong leadership encourages subordinates to go beyond the obligation to obey and commit to the mission in a way that maximizes their potential. *The Military Leadership Handbook* is a concise and complete manual that identifies, describes, and explains all those concepts, components, and ideas that deal with or directly relate to military leadership. The book is a comprehensive compendium that focuses on, among other subjects, cohesion, command, cultural intelligence, discipline, fear, and trust. This applied manual provides invaluable assistance to anyone who wishes to acquire a better understanding of both the theory and application of military leadership. **Normal Instructor**, 1930. **U S NEWS ULTIMATE COLLEGE DIRECTORY 2004** MCGRATH ANNE (EDITOR), 2003.
