School Libraries in a Time of Change Kathleen W. Craver, 2019-08-01 By becoming practical futurists school librarians can help their libraries not only to survive sweeping changes in education but to thrive This book shows how to spot technological trends and use them to your library's advantage During this time of rapid modernization of technology and educational reform this book is a must read for school librarians tasked with ensuring their libraries meet evolving standards This title provides the research and organizational techniques and skills they need to gain seats at the table of the three power committees technology curricula and strategic planning School librarians need to collect and publicize national and local school based evidence that shows the positive correlations between school librarians and student achievement Craver notes correlative sources and provides ideas to employ them to ensure that school librarians remain indispensable In addition acquiring technological skills and becoming expert at their application are paramount for librarians Even more important is the need for librarians to assume sole responsibility for designing and integrating information literacy and critical thinking skills throughout the curriculum Craver analyzes studies that show students inability to discern fact from fiction ads from news and information bias in electronic information sources and recommends six actions that school librarians take to ensure that they become active participants in their future rather than its victims

The Shifts and the Shocks Martin Wolf, 2014-09-04 In The Shifts and the Shocks Martin Wolf one of the world's most influential economic commentators and author of Why Globalization Works presents his controversial and highly original analysis of the economic course of the last seven years There have been many books that have sought to explain the causes and courses of the financial and economic crisis which began in 2007

8 The Shifts and the Shocks is not another detailed history of the crisis but the most persuasive and complete account yet published of what the crisis should teach us about modern economies and economics The book identifies the origin of the crisis in the complex interaction between globalization hugely destabilizing global imbalances and our dangerously fragile financial system In the eurozone these sources of instability were multiplied by the tragically defective architecture of the monetary union It also shows how much of the orthodoxy that shaped monetary and financial policy before the crisis occurred was complacent and wrong In doing so it mercilessly reveals the failures of the financial political and intellectual elites who ran the system The book also examines what has been done to reform the financial and monetary systems since the worst of the crisis passed Are we now on a sustainable course Wolf asks The answer is no He explains with great clarity why further crises seem certain and why the management of the eurozone in particular guarantees a huge political crisis at some point in the future Wolf provides far more ambitious and comprehensive plans for reform than any currently being implemented Written with all the intellectual command and trenchant judgement that have made Martin Wolf one of the world's most influential economic commentators The Shifts and the Shocks matches impressive analysis with no holds barred criticism and persuasive prescription for a more stable future It is a book no one with an interest in global affairs will want to neglect

MARTIN WOLF is Associate Editor and Chief Economics Commentator at the Financial Times London He is the recipient of many awards for financial journalism for which he was also made a CBE in 2000 His previous books include Why Globalization Works and Fixing Global Finance We have been inundated with books about the financial aspects of the crisis There have also been many books about specific institutions or memoirs by retired policy makers We need something different There are two dimensions of the crisis that have received surprisingly little treatment One is the link between developments in the macro economy and the behaviour of the financial sector The other is the global dimension of the crisis Both these lie at the heart of Martin Wolf's analysis of the causes of the crisis and of his proposals to reduce the risk of another crisis For these two reasons this is an important book that will be influential Most

important of all it is in my view the right analysis and remedy Mervyn King To think straight about the causes and solutions of the financial crisis we must reject orthodox assumptions that more finance and global financial integration are limitlessly beneficial The Shifts and the Shocks does just that providing an intellectually sparkling and vital account of why the crisis occurred and of the radical reforms needed if we are to avoid a future repeat Adair Turner Martin Wolf is unsurpassed in the world of economic journalists His superb book may be the best of all those spawned by the Great Recession It is analytical and rigorous without ever succumbing to fatalism or complacency Lawrence Summers

School Choice in Europe Robert Maranto, Tommaso Agasisti, Rodrigo Queiroz e Melo, 2024-12-23 In this book leading experts present rigorous readable studies of education policies and school markets in 11 European countries from Ireland to Ukraine offering lessons for researchers policymakers and educators No other book fills this niche Americans debating whether parents choosing their children's schools will improve education would be wise to learn from a century of experience in Europe where most governments have long subsidized private schools including religious schools Likewise Europeans debating this issue may learn that there is a varied landscape of state private school arrangements around Europe and that the one specific to their country may be enriched by these experiences This volume brings together leading European researchers who present rigorous readable studies exploring how education markets work in 11 European countries from Ireland to Ukraine The chapters cover a range of topics including empirical examinations of the reasons Irish parents choose single sex education how a Ukrainian school improvised to serve students and parents in a war zone how school choice defused culture wars in countries as varied as the Netherlands and Estonia how the German left and right embraced increased parental agency for different reasons the effectiveness of central regulations of autonomous British schools how changing subsidy levels affect demand for private schooling in Italy and Portugal the motivations of Hungarian parents choosing schools and the impacts of social class on schooling choices and policies in Sweden Germany and Spain This volume will be a key resource for academics researchers and advanced students of education education policy and leadership educational research economics and sociology The chapters included in this book were originally published in the Journal of School Choice
