El transporte de contenedores: terminales, operatividad y casuística Ricard Mari Sagarra, Adamir J. De Souza, Juan Martín Mallofré, Jaime Rodrigo de Larrucea, 2009-07 Con el trascurso de los años el contenedor es la unidad de transporte que mayor crecimiento ha experimentado en todas sus modalidades debido a su adaptación a las necesidades del comercio y mejores aspectos positivos ha aportado para la reducción de daños a las mercancías. No obstante el complicado y tecnificado entramado terrestre que hace posible la agilidad del servicio quizá resulte desconocido en muchos de sus aspectos estructurales y organizativos así como de las instalaciones o procedimientos de trabajo seguidos en las terminales portuarias especializadas. Esta publicación pretende acercar a los profesionales del transporte marítimo los procedimientos de diseño y de organización que se siguen en la manipulación de los contenedores así como la relación existente entre el buque especializado y la terminal a la que se vincula en el transporte multimodal. Por su importancia se analiza también la tipología de daños que tanto el propio contenedor como su contenido pueden sufrir en el transporte y la manipulación. La procedencia y las características pluridisciplinarias de los autores ofrecen la oportunidad de entender el tema desde una óptica internacional española y autónoma con aplicaciones a la seguridad y a los aspectos legales relacionados directamente con esta modalidad de transporte.

Estiba y trincaje de mercancías en contenedor Francisco Fernández

Sasiain, 2024-02-08 El comercio internacional se realiza mayoritariamente en contenedores cuyo transporte requiere de estrictas condiciones de seguridad en las que la estiba y la sujeción de las mercancías son factores clave para reducir los costes logísticos, evitar siniestros e incrementar la seguridad de las mercancías. Este manual analiza las normas de estiba y sujeción de las mercancías en contenedores de transporte en buques, semirremolques, de carretera, vagones y contenedores de carga aérea entre otros. Para ello toma como referencia las normas y recomendaciones de la OMI, la OIT y la ONU como son los códigos CSS y CTU de 1997 e incorpora todas las novedades del código CTU de 2014. El autor, experto profesional y docente universitario, analiza la tipología de las mercancías y unidades de transporte de carga, los embalajes, los medios de transporte, los tipos de contenedor y expone numerosos casos prácticos de forma detallada y didáctica. *Corpus*

Resilience and Autonomy in Prewar and Wartime Japan Hiromi Murakami, 2023-12-15 Resilience and Autonomy in Prewar and Wartime Japan The Internal Governance of Industries 1925-1945 illuminates the processes by which industrial manufacturing organizations in Japan

conducted collective actions and how and under what conditions industries interacted with each other and responded to government interference Surprisingly the nature of the struggle between the authorities and the private sector in Japan remains the same today as it did during the prewar period The private sector had been frustrated with impractical state policies and responded vigorously because its survival was at stake This book specifically delves into the manufacturing industries and explores the extent to which industry groups collectively responded to crisis situations and interacted with the authorities It highlights the remarkable resilience leadership and initiative displayed by the industry sector in self governance and assertion of power over authorities even when government controls were nominally in effect Handbook for Inventorying Surface Fuels and Biomass in the Interior West James Kerr Brown,Rick D. Oberheu,Cameron M. Johnston,1982 Presents comprehensive procedures for inventorying weight per unit area of living and dead surface vegetation to facilitate estimation of biomass and appraisal of fuels Provides instructions for conducting fieldwork and calculating estimates of downed woody material forest floor litter and duff herbaceous vegetation shrubs and small conifers Procedures produce the most accurate estimates in the Interior West however techniques for herbs litter and downed woody material are applicable anywhere Includes computer program and card punching instructions for processing inventory data *Yearbook of International Organizations* ,2000 **Inscriptiones urbis Romae Latinae** Heinrich Dressel,1876
