

Set your suspension rail

With the new IKEA kitchen system, your cabinets can be hung directly onto a suspension rail making them easier to install and easier to adjust. It's important to make sure your suspension rail is straight and level, and to secure it with the right screw type for your wall.

Marking the right height for your suspension rail

Your base suspension rail needs to be hung $32\frac{3}{16}"$ above your floor's highest point (measure to the underside of the rail). You should allow $22\frac{5}{16}"$ between the bottom of your wall cabinets and the bottom of your base rail when measuring for your upper rail.

Fasten your rails, base rail first. Make sure you've found suitable points in the wall where the rails can be fastened and that the rails are level before drilling.

If your wall is uneven use shims between the rail and the wall to make sure the rail is flush.

Use a level to check that each rail is level.
