The Professional Practice of Architectural Working Drawings teaches you how to become fluent in the visual language of architecture to communicate more effectively with all project stakeholders.

Computers, Jobs, and Skills Christopher Baldry, 2012-12-06 Faith, Hope and Charity and the greatest of these is Charity. Hardware, software and Lillies are and the greatest of these is As information technology ceased to be the prerogative of computer scientists and electronics engineers, those of us from other disciplines had to contend with the jargon which was already in vogue. We learned to live with hardware and software. We were less enthusiastic about liveware. Polite and some impolite questioning revealed that liveware was a euphemism for people. We were not amused. As one spirited participant observed, I refused to go home and tell my children that Almighty God had made liveware in His own image and likeness. People are too important to be known as anything but people. Moreover, it is the importance of people that is the dominating and recurring theme of this book by Christopher Baldry. He deals with virtually every aspect of the problems concerning men and women and their recourse to the equipment. This could well become the definitive work in the field. In addition to the details of health hazards, industrial relations, new technology, agreements and the like, Dr Baldry grapples with two great underpinning issues.

Ship Construction David J. Eyres, 2001 Ship Construction is a comprehensive text for students following BTEC courses in nautical science, naval architecture and shipbuilding and courses leading to BSc Nautical Science or Extra Masters Certificate. The author presents seven sections that begin with an introduction to ship building and conclude with the finished product. There is a concise description of all the relevant international regulations. The seven sections cover the development of ship types, materials and strengths of ships, welding and cutting, shipyard practice, ship structure and outfitting. Each section is broken down into several chapters that explore the topics in depth. The fifth edition expands further on the development of ship types over the last few years, discussion focussing on the latest views on bulk carrier safety. Welding and shipyard practices have been reviewed and revised in line with current practice. In addition, the book covers all the latest IMO and SOLAS information. Follows chapter by chapter the construction of a ship from start to finish. IMO and SOLAS latest information covered. Essential for both nautical students and professional students of naval architecture.
