It is not a theoretical vision. It is a model of instruction refined in some of the nation's most successful public schools—schools that are beating the odds to create remarkable achievement, sited primarily in urban and rural low-income communities. Using case studies and examples of powerful learning at all grade levels and in all disciplines, *Learning That Lasts* is a guide to creating classrooms that promote deeper understanding, higher order thinking, and student independence. Through text and companion videos, readers will enter inspiring classrooms where students go beyond basics to become innovators, collaborators, and creators. *Learning That Lasts* embraces a three-dimensional view of student achievement that includes mastery of knowledge and skills, character, and high quality work. It is a guide for teachers who wish to make learning more meaningful, memorable, and connected to life, and inspire students to do more than they think possible.

**The Maestro Speaks of His Musical Journey** MAJOR JOE B. WILLIAMS OD, 2014-02-27 This book demonstrates that one is capable of achieving any goals that one sets for him herself I hope it will be an inspiration to others as they journey along the pathways of life This book summarizes the achievements the difficulties and sometimes struggles that were encountered along the way It speaks of anxiety fear anticipation but never apathy There were times of restlessness working and studying until the wee hours of the morning just to meet the class assignments Those were used as motivation to succeed The vagaries of the weather in the UK and its unpredictability played a part in my planning every move and decision That too helped me to realize the nature of

things and how essential it is to prepare if possible for the future It is indeed a wonderful feeling when one is able to look back over many years on a long journey and a productive life and feel satisfied that something of note has been left behind I trust this book will give food for thought and be of help to others      *Re-imagining University Assessment in a Digital World* Margaret Bearman, Phillip Dawson, Rola Ajjawi, Joanna Tai, David Boud, 2020-07-13 This book is the first to explore the big question of how assessment can be refreshed and redesigned in an evolving digital landscape There are many exciting possibilities for assessments that contribute dynamically to learning However the interface between assessment and technology is limited Often assessment designers do not take advantage of digital opportunities Equally digital innovators sometimes draw from models of higher education assessment that are no longer best practice This gap in thinking presents an opportunity to consider how technology might best contribute to mainstream assessment practice Internationally recognised experts provide a deep and unique consideration of assessment's contribution to the technology mediated higher education sector The treatment of assessment is contemporary and spans notions of assessment for learning measurement and the roles of peer and self within assessment Likewise the view of educational technology is broad and includes gaming learning analytics and new media The intersection of these two worlds provides opportunities dilemmas and exemplars This book serves as a reference for best practice and also guides future thinking about new ways of conceptualising designing and implementing assessment      **Scientific Literacy Under the Microscope** John Loughran, Kathy Smith, Amanda Berry, 2011-11-19 Scientific literacy is generally valued and acknowledged among educators as a desirable student learning outcome However what scientific literacy really means in terms of classroom practice and student learning is debatable due to the inherent complexity of the term and varying expectations of what it means for learning outcomes To date the teacher voice has been noticeably absent from this debate even though the very nature of teacher expertise lies at the heart of the processes which shape students scientific literacy The chapters that comprise this book tap into the expertise of a group of primary teachers from Our Lady of Good Counsel OLG C a primary school that chose to actively engage in teaching for scientific literacy By analyzing the insights and thinking that emerged as they attempted to unravel some of the pedagogical complexities associated with constructing an understanding of scientific literacy in their own classrooms these teachers demonstrate the professional knowledge and skill inherent in the expertise of teaching and learning science in a primary classroom The chapters in this book illustrate the processes and structures that were created at OGLC to provide the conditions that allowed these teachers to explore and build on the range of ideas that informed their approach to teaching for scientific literacy This book is a compelling example of how a whole school approach to scientific literacy can make a difference for students learning of science and offer a concrete example of the development of professional knowledge and practice of teachers      **A Principal's Personal Journey** Sylvester Carrington Ed.
