Engaging in Educational Research Raqib Chowdhury, Mahbub Sarkar, Foez Mojumder, M Moninoor Roshid, 2018-10-01 This book reflects

the paradigm shift now manifesting in Bangladesh's education system by highlighting recent empirical research. It shares essential insights by presenting research conducted on diverse aspects of current day education in Bangladesh including policy and governance, equity, access and participation, curriculum and pedagogy, assessment and education programs and projects run by NGOs. Further, it offers a platform for these unique studies to be showcased and disseminated to scholars and researchers from developing and developed countries alike and represents a unique reference resource for the education research community in Bangladesh, Asia and all over the world. With Foreword from Professor Serajul Islam Choudhury.

**Markedness in synchrony and diachrony** Olga Miseska Tomic, 2011-07-19. *TRENDS IN LINGUISTICS* is a series of books that open new perspectives in our understanding of language. The series publishes state-of-the-art work on core areas of linguistics across theoretical frameworks as well as studies that provide new insights by building bridges to neighbouring fields such as neuroscience and cognitive science. *TRENDS IN LINGUISTICS* considers itself a forum for cutting-edge research based on solid empirical data on language in its various manifestations including sign languages. It regards linguistic variation in its synchronic and diachronic dimensions as well as in its social contexts as important sources of insight for a better understanding of the design of linguistic systems and the ecology and evolution of language. *TRENDS IN LINGUISTICS* publishes monographs and outstanding dissertations as well as edited volumes which provide the opportunity to address controversial topics from different empirical and theoretical viewpoints. High quality standards are ensured through anonymous reviewing.

**Applying Software Metrics** Paul Oman, Shari Lawrence Pfleeger, 1996-11-13. Features a useful collection of important and practical papers on applying software metrics and measurement. The book details the importance of planning a successful measurement program with a complete discussion of why, what, where, when and how to measure and who should be involved. Each chapter addresses these significant questions and provides the essential answers in building an effective measurement program. The book differs from others on the market by focusing on the application of the metrics rather than the metrics themselves. The authors provide information based on actual experience with successful metrics programs. Each chapter includes a case study focusing on technology transfer and a set of recommended references. The book serves as a guide on the use and application of software metrics in industrial environments. It is specially designed for managers, product supervisors and quality assurance personnel who want to know how to implement a metrics program.

**New Trends in Analysis and Geometry** Mohamed A. Khamsi, 2020-01-24. This unique mathematical volume brings together geometers, analysts, differential equations specialists and graph theorists to provide a glimpse on recent mathematical trends whose commonalities have hitherto remained for the most part unnoticed. The applied mathematician will be pleasantly surprised with the interpretation of a voting system in terms of the fixed points of a mapping given in the book as much as the classical analyst will be enthusiastic to find detailed discussions on the generalization of the notion of metric space in which the metric takes values on an abstract monoid. Classical themes on fixed point theory are adapted to the diverse setting.

of graph theory thus uncovering a set of tools whose power and versatility will be appreciated by mathematicians working on either area The volume also includes recent results on variable exponent spaces which reveal much needed connections with partial differential equations while the incipient field of variational inequalities on manifolds also explored here will be of interest to researchers from a variety of fields

**How High the Sky?** Thomas Gangale, 2018-11-26 In *How High the Sky* jurist Thomas Gangale explores the oldest and most important controversy in space law how far up does national airspace go and where does the international environment of outer space begin Even though nations did not object to the first satellites flying over their sovereign territory after more than six decades there is still no international agreement on how low the right of space object overflight extends nor are there agreed legal definitions of space object and space activity Dr Gangale brings his background as an aerospace engineer to bear in exploding long held beliefs of the legal community and he offers a draft international convention to settle the oldest and most intractable problems in space law *New York Court of Appeals.*

**Practices to Promote Budget Literacy** Harika Masud, Helene Pfeil, Sanjay Agarwal, Alfredo Gonzalez Briseno, 2017-08-09 Budget literacy is defined as the ability to read decipher and understand public budgets to enable and enhance meaningful citizen participation in the budget process It is comprised of two main parts i a technical understanding of public budgets including familiarity with government spending tax rates and public debt and ii the ability to engage in the budget process comprising of practical knowledge on day to day issues as well as an elementary understanding of the economic social and political implications of budget policies the stakeholders involved and when and how to provide inputs during the annual budget cycle Given that no international standards or guidelines have been established for budget literacy education to date

this book seeks to address this gap by taking stock of illustrative initiatives promoting budget literacy for youth in selected countries. The underlying presumption is that when supply side actors in the budget process governments simplify and disseminate budget information for demand side actors citizens this information will then be used by citizens to provide feedback on the budget. However since citizens are often insufficiently informed about public budgets to constructively participate in budget processes one way to empower them and to remedy the problem of budget illiteracy is to provide budget literacy education in schools to youth helping them evolve into civic minded adults with the essential knowledge needed for analyzing their government's fiscal policy objectives and measures and the confidence and sense of social responsibility to participate in the oversight of public resources. This book elaborates on approaches learning outcomes pedagogical strategies and assessment approaches for budget literacy education and presents lessons that are relevant for the development improvement or scaling up of budget literacy initiatives.
