Lost Land of the Dodo Anthony Cheke, Julian P. Hume, 2009-01-01 The Mascarene islands in the southern Indian Ocean Mauritius Reunion and Rodrigues were once home to an extraordinary range of birds and reptiles Evolving on these isolated volcanic islands in the absence of mammalian predators or competitors the land was dominated by giant tortoises parrots skinks and geckos burrowing boas flightless rails the birds and tortoises were slaughtered indiscriminately while introduced rats cats pigs and monkeys destroyed their eggs the once extensive forests logged and invasive introduced plants from all over the tropics devastated the ecosystem The now familiar icon of extinction the Dodo was gone from Mauritius within 50 years of human settlement and over the next 150 years many of the Mascarenes other native vertebrates followed suit The product of over 30 years research by Anthony Cheke *Lost Land of the Dodo* provides a comprehensive yet hugely enjoyable account of the story of the islands changing ecology interspersed with human stories the islands biogeographical anomalies and much else Many French publications old and new especially for Reunion are discussed and referenced in English for the first time The book is richly illustrated with maps and contemporary illustrations of the animals and their environment many of which have rarely been reprinted before Illustrated box texts look in detail at each extinct vertebrate species while Julian Hume's superb colour plates bring many of the extinct birds to life *Lost Land of the Dodo* provides the definitive account of this tragic yet remarkable fauna and is a must read for anyone interested in islands their ecology and the history of our relationship with the world around us
