## INSPECTING YOUR RIFLE

- 1. When you inspect your rifle, you should first check to make sure it is unloaded. To do this, pump the bolt and open the magazine. Look for the magazine to be in the open position. Release the magazine release and remove the magazine (Figure 5).
- 2. Next, the charging handle of the rifle is used (Figure 6). Press and hold the lower portion of the bolt carrier down (Figure 7) while you rotate the handle on the charging handle. This will lock the bolt in the open position. Release the charging handle fully forward until it locks and remove the bolt from the rifle.
- 3. Place your index finger on the SAFETY (Fig 8).

**NOTE:** When handling the M4P, if the safety selector does not easily rotate to the "SAFE" position, DO NOT attempt to force it into "SAFE" while keeping the magazine pointed in a safe direction. Remove the magazine and lock your bolt open as instructed here and then rotate the safety selector to "SAFE" before proceeding.

**NOTE:** Pull the charging handle to both sides uniformly. The left side contains the lock that keeps the charging handle locked forward when it's not in use (Figure 9).

- 4. Look into the receiver and check the chamber to be sure no cartridges are present (Figure 10).
- 5. You must follow this procedure every time a trigger leaves your hand, is changed, handed to you or another person, transported or stored.
