40 **Programming Languages and Systems** Giuseppe Castagna,2009-03-09 ETAPS 2009 was the 12th instance of the European Joint Conferences on Theory and Practice of Software ETAPS is an annual federated conference that was established in 1998 by combining a number of existing and new conferences This year it comprised five conferences CC ESOP FASE FOSSACS TACAS 22 satellite workshops ACCAT ARSPA WITS Bytecode COCV COMPASS FESCA FInCo FORMED GaLoP GT VMT HFL LDFA MBT MLQA OpenCert PLACES QAPL RC SafeCert TAASN TERMGRAPH andWING four tutorials andseveninvitedlectures excludingthose thatwere specific to the satellite events The five main conferences received 532 submissions including 30 tool demonstration papers 141 of which were accepted 10 tool demos giving an overall acceptance rate of about 26% with most of the conferences at around 25% Congratulations therefore to all the authors who made it to the final programme I hope that most of the other authors will still have found a way of participating in this exciting event and that you will all continue submitting to ETAPS and contributing towards making it the best conference on software science and engineering The events that comprise ETAPS address various aspects of the system development process including specification design implementation analysis and improvement The languages methodologies and tools which support these activities are all well within its scope Different blends of theory and practice are represented with an inclination towards theory with a practical motivation on the one hand and soundly based practice on the other Mathematics of Program Construction Roland Backhouse,Jose Nuno Oliveira,2006-12-30 This volume contains the proceedings of MPC 2000 the fifth international conference on Mathematics of Program Construction This series of conferences aims to promote the development of mathematical principles and techniques that are demonstrably useful and usable in the process of constructing computer programs whether implemented in hardware or software The focus is on techniques that combine precision with concision enabling programs to be constructed by formal calculation Within this theme the scope of the series is very diverse including programming methodology program specification and transformation programming paradigms programming calculi and programming language semantics The quality of the papers submitted to the conference was in general very high However the number of submissions has decreased compared to the previous conferences in the series Each paper was refereed by at least five and often more committee members In order to maintain the high standards of the conference the committee took a stringent view on quality this has meant that in some cases a paper was rejected even though there was a basis for a good

ference or journal paper but the submitted paper did not meet the committee's required standards. In a few cases a good paper was rejected on the grounds that it did not fit within the scope of the conference.
