Do you want to learn to read people's minds? In this student-friendly practice-focused textbook on EEG and biosignal analysis, you will learn how to implement your experiment in E Prime or OpenSesame. Run your study in the psychophysiological laboratory. Analyse data in MATLAB by following simple steps. This textbook follows a unique approach by guiding you through a single EEG study, each part introducing the relevant core knowledge and commonly available software. Practical exercises help you master the skills to independently implement every aspect of an experiment, from setting up the lab to analysing the data. Suitable for developing both basic levels of skill for undergraduates as well as advancing towards a stronger command of analysis and understanding at postgraduate level. Michiel Spape is a Lecturer and Researcher in Psychology at the University of Helsinki. **A Petroleum Geologist's Guide to Seismic Reflection** William Ashcroft, 2011-05-06

This book is written for advanced earth science students, geologists, petroleum engineers, and others who want to get quickly up to speed on the interpretation of reflection seismic data. It is a development of material given to students on the MSc course in Petroleum Geology at Aberdeen University and takes the form of a course manual rather than a systematic textbook. It can be used as a self-contained course for individual study or as the basis for a class programme. The book clarifies those aspects of the subject that students tend to find difficult and provides insights through practical tutorials which aim to reinforce and deepen understanding of key topics and provide the reader with a measure of feedback on progress. Some tutorials may only involve drawing simple diagrams, but many are computer-aided PC-based with graphics output to give insight into key steps in seismic data processing or into the seismic response of some common geological scenarios. Part I of the book covers basic ideas and it ends with two tutorials in 2-D structural interpretation. Part II concentrates on the current seismic reflection contribution to reservoir studies based on 3-D data.
