

# Economics and Management Sciences Grade 8

## Summary

### **Topic 13 Levels and functions of management**

#### **Unit 1 Different management levels**

##### **What is management?**

- Process during which people or things are handled, controlled and guided.
- an act during which people's cooperation is obtained to achieve a particular goal through the efficient use of the available resources.

##### **A manager?**

- A manager is someone who works with the people in an organisation, guides them and exercises control over them.
- It is the responsibility of the manager to make sure that the work is done correctly so that the goals of the organization can be achieved.
- A manager is the person who runs the business or organization, or the person in charge of a division or one of the teams in an organization.
- If you work together in a group and you are chosen as the group leader, you become the "manager" of the group.
- In a small business, the owner can also be the manager.
- In a large business, there are numerous managers, each of whom is responsible for managing different departments.
- As a group leader, your decisions will not be as important as those of your teacher.
- The same is true in the case of an organization in which not all the managers have the same responsibility to make important decisions.
- Managers are usually classified according to the different levels in a business.
- The level at which a manager operates will depend on the contribution his responsibilities and decisions make to the overall success of the business.

##### **The different management levels**

###### **Top level management.**

- Bears the greatest responsibility to make sure that the organization is successful and achieves its goals.
- The goal of most businesses is not only to make a profit, but also to ensure that the owner gets a good return on the money invested in the business.
- Managers in top management positions must decide what goals the business wants to achieve.
- There are usually very few top managers in an organization.

**Sustainability** Walter Leal Filho, 2019-01-14 This book comprehensively describes social responsibility and sustainable development with contributions from scientists and representatives from industry working in the field The papers are innovative cross cutting and many share practice based experiences some of which may be replicable elsewhere Prepared by the Inter University Sustainable Development Research Programme IUSDRP and the World Sustainable Development Research and Transfer Centre WSD RTC it reiterates the current need to promote social responsibility Social responsibility and sustainable development are two different concepts whose integration over the years has led to significant advances in the way enterprises see and perceive their operations It is not only about policies or steps taken to meet legal requirements but is also about social equality and environmental accountability also bearing in mind the links with eco efficiency innovation and the health and wellbeing of workers According to ISO 26000 social responsibility is the responsibility of an organisation for the impacts of its decisions and activities on society and the environment through transparent and ethical behaviour that a contributes to sustainable development including health and the welfare of society b takes into account the

expectations of stakeholders c is in compliance with applicable law and consistent with international norms of behaviour d is integrated throughout the organisation and practised in its relationships But even though the relations between social responsibility and sustainability are strong it is still necessary to encourage organisations to adhere to or at least follow the principles of sustainable development in their operations giving something back to the community As such there is a need for a better understanding of how social responsibility is related to sustainable development and of the identification of processes methods and tools that may help the integration of these two important elements There is also a real need to showcase successful examples of how to structure behaviour and institutional practice in line with the sustainability challenges we face today Chapter Reviewing the Stakeholder Value Creation Literature Towards a Sustainability Approach is available open access under a Creative Commons Attribution 4.0 International License via [link.springer.com](https://link.springer.com)
