Speight, 2021-02-17 Rund ein Viertel des weltweiten Energieverbrauchs wird mit Kohle bestritten und von der weltweit geforderten Kohle werden ca 65 % an Stromerzeuger und 33 % an industrielle Abnehmer geliefert wobei der Rest überwiegend an Verbraucher im privaten und gewerblichen Bereich geht Es wird erwartet dass der Anteil der Kohle am gesamten Energieverbrauch weltweit bis 2035 auf knapp 30 % steigt Dieses Werk beschreibt die Herausforderungen und die einzelnen Schritte bei der Energieproduktion aus Kohle und befasst sich mit den Herausforderungen beim Umgang mit Umweltschutzbedenken gegen die Nutzung von Kohle in den Kraftwerken der Zukunft Es werden neue Technologien beschrieben mit denen die Freisetzung von schädlichen Schwefel Stickstoff und Quecksilberpartikeln bei der Verbrennung von Kohle zur Stromerzeugung nahezu eliminiert werden kann Außerdem wird beschrieben mit welchen Technologien sich die von den Kohlekraftwerken ausgestoßenen Treibhausgase abscheiden lassen und wie es möglich ist zu verhindern dass diese Emissionen zur globalen Erwärmung beitragen Das Buch ist von einem der weltweit führenden Energieexperten verfasst und ist ein absolutes Muss für alle Ingenieure Wissenschaftler und Studierenden in diesem Fachbereich denn es dient als wertvolles Nachschlagewerk und Leitfaden in einem sich rasch verändernden Umfeld **Prebiotic Chemistry and Chemical Evolution of Nucleic Acids** César

Menor-Salván, 2018-08-01 The origin of life is one of the biggest unsolved scientific questions This book deals with the formation and first steps of the chemical evolution of nucleic acids including the chemical roots behind the origin of their components from the simplest sources in a geochemical context Chemical evolution encompasses the chemical processes and interactions conducive to self assembly and supramolecular organization leading to an increase of complexity and the emergence of life The book starts with a personal account of the pioneering work of Stanley Miller and Jeffrey Bada on the Chemistry of Origins of Life and how the development of organic chemistry beginning in the 19th century led to the emergence of the field of prebiotic chemistry situated at the frontier between organic geo and biochemistry It then continues reviewing in tutorial manner current central topics regarding the organization of nucleic acids the origin of nucleobases and nucleosides their phosphorylation and polymerization and ultimately their self assembly and supramolecular organization at the inception of life Bikeri Attila Gyucha, William A. Parkinson, Richard W. Yerkes, 2021-11-15 The transition from the

Neolithic period to the Copper Age in the northern Balkans and the Carpathian Basin was marked by significant changes in material culture settlement layout and organization and mortuary practices that indicate fundamental social transformations in the middle of the fifth millennium BC Prior research into the Late Neolithic of the region focused almost exclusively on fortified tell settlements The Early Copper Age by contrast was known primarily from cemeteries such as the type site of

Tiszapolgar Basatanya This edited book describes the multi disciplinary research conducted by the Koros Regional Archaeological Project in southeastern Hungary from 2000 2007 Centered around two Early Copper Age Tiszapolgar culture villages in the Koros Region of the Great Hungarian Plain Veszto Bikeri and Korosladany Bikeri our research incorporated excavation surface collection geophysical survey and soil chemistry to investigate settlement layout and organization Our results yielded the first extensive systematically collected datasets from Early Copper Age settlements on the Great Hungarian Plain The two adjacent villages at Bikeri located only 70 m apart were similar in size and both were protected with fortifications Relative and absolute dates demonstrate that they were occupied sequentially during the Early Copper Age from ca 4600 4200 cal B C The excavated assemblages from the sites are strikingly similar suggesting that both were occupied by the same community This process of settlement relocation after only a few generations breaks from the longer lasting settlement pattern that are typical of the Late Neolithic but other aspects of the villages continue traditions that were established during the preceding period including the construction of enclosure systems and longhouses Circular - Office of Education United States. Action of light and organic crystals Oktay Sinanoğlu,1965 **Bioremediation of Petroleum and Petroleum Products**

James G. Speight, Karuna K. Arjoon, 2012-11-07 With petroleum related spills explosions and health issues in the headlines almost every day the issue of remediation of petroleum and petroleum products is taking on increasing importance for the survival of our environment our planet and our future This book is the first of its kind to explore this difficult issue from an engineering and scientific point of view and offer solutions and reasonable courses of action This book will guide the reader through the various methods that are used for the bioremediation of petroleum and petroleum products The text is easy to read and includes many up to date and topical references This book introduces the reader to the science and technology of biodegradation a key process in the bioremediation of petroleum and petroleum based contaminants at spill sites The contaminants of concern in the molecularly variable petroleum and petroleum products can be degraded under appropriate conditions But the success of the process depends on the ability to determine the necessary conditions and establish them in the contaminated environment Although the prime focus of the book is to determine the mechanism extent and efficiency of biodegradation it is necessary to know the composition of the original petroleum or petroleum product The laws of science dictate what can or cannot be done with petroleum and petroleum products to ensure that biodegradation hence bioremediation processes are effective The science of the composition of petroleum and petroleum products is at the core of understanding the chemistry of biodegradation and bioremediation processes Hence inclusion of petroleum analyses and properties along with petroleum product analyses and properties is a necessary part of this text Bioremediation of Petroleum and Petroleum Products Summarizes the pros and cons of remediation of petroleum and petroleum based products from an environmental perspective Gives examples of unethical behavior and how they should be corrected Offers arguments and elucidates engineering considerations on all sides of these difficult environmental and economic issues Spectra of Atoms and Molecules Peter F. Bernath, 2020 This volume emphasizes the fundamental principles of spectroscopy and teaches students how to interpret spectra **Quantitative Spectroscopy: Theory and Practice** Brian C. Smith, 2003-01-17 The determination of the concentrations of molecules in samples has long been an important application of spectroscopy In the last 20 years advances in algorithms computers instruments and software have led to a growing interest in this field These developments mean samples and analytes that were once considered intractable are increasingly yielding usable calibrations The purpose of this book is to give readers without an advanced math background a thorough grounding in the theory and practice of modern quantitative spectroscopic analysis The author has placed great emphasis on providing the reader with everything they need to know to obtain a fundamental understanding of quantitative spectroscopy Relevant theory is explained in an easy to understand conversational style Actual spectroscopic data and calibrations are used throughout the book to show how real world calibrations are achieved The complexities of Factor Analysis PCR PLS algorithms are explained in pictures and words making them understandable for all Written from a spectroscopic rather than a mathematical point of

view Relevant theory is interspersed with practical discussions in order to make difficult concepts easier to comprehend It is a comprehensive introduction for novices and an excellent reference for experts Topics on spectroscopy are included to emphasize its importance in quantitative spectroscopy **Computational Materials Science** ,2004-03-19 Computational tools have been permanently deposited into the toolbox of theoretical chemists The impact of new computational tools can hardly be overestimated and their presence in research and applications is overwhelming Theoretical methods such as quantum mechanics molecular dynamics and statistical mechanics have been successfully used to characterize chemical systems and to design new materials drugs and chemicals This volume on Computational Material Sciences covers selected examples of notable applications of computational techniques to material science The chapters contained in this volume include discussions of the phenomenon of chaos in chemistry reaction network analysis and mechanisms of formation of clusters Details of more practical applications are also included in the form of reviews of computational design of new materials and the prediction of properties and structures of well known molecular assemblies Current developments of effective computational methods which will help in understanding predicting and optimizing periodic systems nanostructures clusters and model surfaces are also covered in this volume Reviews of current computational methods applied in material science Reviews of practical applications of modelling of structures and properties of materials Cluster and periodical approaches **Acidic Deposition and Aquatic Ecosystems** Susan Christie,Donald F. Charles,2013-04-17 Acidic deposition and its effect on aquatic ecosystems have become major scientific and public policy issues in the United States since the early 1970s and many diverse studies have been completed This book is the first comprehensive integrated synthesis of available information on current and potential effects of acidic precipitation on lakes and streams in geographic regions with a high number of low alkalinity surface water from the Adirondacks and the Southern Blue Ridge to the Upper Midwest to the Rocky Mountains the Sierra Nevada and the Cascades Written by leading authors the book examines the current status of water chemistry and characterizes the processes controlling water chemistry on a regional basis by using and comparing high quality data sets Methods for the assessment of long term changes in water chemistry and their effects in fish and other biota are also presented The book amply illustrates the substantial diversity among geographical regions with respect to the nature of surface waters and the complexity of their response to acidic deposition This volume will be of great interest to researchers in limnology aquatic ecology environmental chemistry hydrology and atmospheric sciences It will also serve as an important reference for environmental managers and policy makers *Modern Biopolymer Science* Stefan Kasapis,Ian T. Norton,Johan B Ubbink,2009-07-21 Industrialists developing new food and pharmaceutical products face the challenge of innovation in an increasingly competitive market that must consider ingredient cost product added value expectations of a healthy life style improved sensory impact controlled delivery of active compounds and last but not least product stability While much work has been done to explore understand and address these issues a gap has emerged

between recent advances in fundamental knowledge and its direct application to product situations with a growing need for scientific input Modern Biopolymer Science matches science to application by first acknowledging the differing viewpoints between those working with low solids and those working with high solids and then sharing the expertise of those two camps under a unified framework of materials science Real world utilisation of fundamental science to achieve breakthroughs in product development Includes a wide range of related aspects of low and high solids systems for foods and pharmaceuticals Covers more than bio polymer science in foods by including biopolymer interactions with bioactive compounds issues of importance in drug delivery and medicinal chemistry
