**Property and Human Rights in a Global Context** Ting Xu,Jean Allain,2016-03-24 Property as a human rights concern is manifested through its incorporation in international instruments and as a subject of the law through property related cases considered by international human rights organs Yet for the most part the relationship between property and human rights has been discussed in rather superficial terms lacking a clear substantive connection or common language That said the currents of globalisation have witnessed a new era of interrelation between these two areas of the law including the emergence of international intellectual property law and the recognition of indigenous claims which in fundamental ways speak to an engagement with human rights law This collection starts the conversation between human rights lawyers and property lawyers and explores analytical approaches to the increasing relationship between property and human rights in a global context The chapters engage with key theoretical and policy debates and range across three main themes The re evaluation of the public private divide in the law the tensions between the market and social justice in development and the balance between the rights of individuals and those of communities The chapters adopt a global

comparative perspective and engage in case studies from countries including India Philippines Brazil the United States the United Kingdom and includes various regions of Africa and Europe      **Routledge Handbook on the Green New Deal** Kyla Tienhaara, Joanna Robinson, 2022-08-26 In recent years the Green New Deal has moved from relative obscurity to front and centre of policy discussions and public debates about how to respond to the climate crisis It has been credited with radically changing the nature of the conversation on climate change and with re energizing the environmental movement at a critical time All Green New Deal proposals share an emphasis on the need for governments rather than markets to lead the energy transition However they differ in other respects This Handbook analyses the fundamentals underlying all Green New Deals as well as exploring national and regional variations It is divided into three parts The first part examines the political economy of the Green New Deal focussing not just on how proposals will be costed but also on opportunities for a fundamental transformation of both national economies and the global economic system The second part explores issues of justice which are central to many Green New Deal proposals including Indigenous rights racial and gender equity and justice for the Global South In the third part authors detail case studies of Green New Deal proposals and plans at the local national and regional level This book will be an invaluable research and reference volume for students and scholars in economics politics sociology geography and environmental studies It should also be of interest to those actively involved in climate and environmental policymaking      *They Saved the Crops* Don Mitchell, 2012 At the outset of World War II California agriculture seemed to be on the cusp of change Many Californians reacting to the ravages of the Great Depression called for a radical reorientation of the highly exploitative labor relations that had allowed the state to become such a productive farming frontier But with the importation of the first braceros guest workers from Mexico hired on an emergency basis after the United States entered the war an even more intense struggle ensued over how agriculture would be conducted in the state Esteemed geographer Don Mitchell argues that by delineating the need for cheap flexible farm labor as a problem and solving it via the importation of relatively disempowered migrant workers an alliance of growers and government actors committed the United States to an agricultural system that is in important respects still with us *They Saved the Crops* is a theoretically rich and stylistically innovative account of grower rapaciousness worker militancy rampant corruption and bureaucratic bias Mitchell shows that growers workers and officials confronted a series of problems that shaped and were shaped by the landscape itself For growers the problem was finding the right kind of labor at the right price at the right time Workers struggled for survival and attempted to win power in the face of economic exploitation and unrelenting violence Bureaucrats tried to harness political power to meet the demands of as one put it the people whom we serve Drawing on a deep well of empirical materials from archives up and down the state Mitchell s account promises to be the definitive book about California agriculture in the turbulent decades of the mid twentieth century      *Walled* Andréanne Bissonnette, Élisabeth Vallet, 2025 Thirty years after the first mile of border walls was constructed in the San Diego Tijuana region this volume invites readers to reflect on how

establishes a foundation for critical analysis and programmatic advances as heritage professionals encounter the growing challenge of sustainability

**Sticky Power** Daniel Haberly, Dariusz Wójcik, 2022-05-02 This is an open access title available under the terms of a CC BY NC ND 4.0 International licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. Although modern civilization revolves around money, the nature of money is paradoxical. It is nothing more than a representation of and medium for decentralized networks of social trust, but its production is controlled by highly centralized networks of firms, places, and governments, and there is never enough of it to go around. Moreover, given that the creation of money as credit is based on expectations, money is at its heart an instrument for human agency to change the future. However, the financial systems that produce money are deeply rooted in the past and perpetuate themselves through history. *Sticky Power* seeks to deepen our understanding of the paradox of money by introducing a novel conceptual lens. *Global Financial Networks* casts new light on the geography, history, politics, and sociology of finance from the Middle Ages to the global financial crisis and beyond. It shows that the power of finance is inherently sticky; apparently new innovations such as offshore finance actually date back centuries, and global financial networks more broadly have adapted to the rise and fall of empires and the development of new technologies while changing surprisingly little in their basic character or at most changing very slowly. Haberly and Wójcik argue that a recognition of the mechanics of this durability calls for a new approach to reforming finance: one less reactively focused on regulation and more proactively focused on building new institutional systems with a long-term sticky power of their own.

**Russian Foreign Policy** Jeffrey Mankoff, 2009-04-16 A second edition of this book is now available. This thoughtful and balanced text examines the development of Russian foreign policy since the end of the Cold War. Presenting an evenhanded treatment of controversial issues, Jeffrey Mankoff analyzes Russia's interactions with major global actors, including the United States, the European Union, the Commonwealth of Independent States, and China. Despite Moscow's often harsh rhetoric and the deployment of Russian forces against Georgia in 2008, the author convincingly demonstrates that today's Russia is more interested in restoring what its leaders consider to be its rightful place among the world's major powers than in directly challenging the West. Thoroughly researched and knowledgeable, this book will be invaluable for all students of Russia.

Each author assesses and explores the processes of regional governance in the Arctic from an interdisciplinary perspective. **Islam and the Liberal State** Stephen H. Jones, 2020-11-26 National identity and liberal democracy are recurrent themes in debates about Muslim minorities in the West. Britain is no exception, with politicians responding to claims about Muslims' lack of integration by mandating the promotion of fundamental British values, including

democracy and individual liberty This book engages with both these themes addressing the lack of understanding about the character of British Islam and its relationship to the liberal state It charts a gradual but decisive shift in British institutions concerned with Islamic education Islamic law and Muslim representation since Muslims settled in the UK in large numbers in the 1950s Based on empirical research including interviews undertaken over a ten year period with Muslims and analysis of public events organized by Islamic institutions Stephen Jones challenges claims about the isolation of British Islamic organizations and shows that they have decisively shaped themselves around British public and institutional norms He argues that this amounts to the building of a distinctive British Islam Using this narrative the book makes the case for a variety of liberalism that is open to the expression of religious arguments in public and to associations between religious groups and the state It also offers a powerful challenge to claims about the insularity of British Islamic institutions by showing how the national orientation of Islam called for by British policymakers is in fact already happening
