The Betrayal Kim Christian Priemel, 2018-05-17 At the end of World War II the Allies faced a threefold challenge how to punish perpetrators of appalling crimes for which the categories of genocide and crimes against humanity had to be coined how to explain that these had been committed by Germany of all nations and how to reform Germans The Allied answer to this conundrum was the application of historical reasoning to legal procedure In the thirteen Nuremberg trials held between 1945 and 1949 and in corresponding cases elsewhere a concerted effort was made to punish key perpetrators while at the same time providing a complex analysis of the Nazi state and German history Building on a long debate about Germany's divergence from a presumed Western path of development Allied prosecutors sketched a historical trajectory which had led Germany to betray the Western model Historical reasoning both accounted for the moral breakdown of a civilised nation and rendered plausible arguments that this had indeed been a collective failure rather than

one of a small criminal clique The prosecutors therefore carefully laid out how institutions such as private enterprise academic science the military or bureaucracy which looked ostensibly similar to their opposite numbers in the Allied nations had been corrupted in Germany even before Hitler's rise to power While the argument depending on individual protagonists subject matters and contexts met with uneven success in court it offered a final twist which was of obvious appeal in the Cold War to come if Germany had lost its way it could still be brought back into the Western fold The first comprehensive study of the Nuremberg trials The Betrayal thus also explores how history underpins transitional trials as we encounter them in today's courtrooms from Arusha to The Hague , **Red Zones** Marie-Eve Sylvestre, Nicholas Blomley, Céline Bellot, 2020-01-02 In Red Zones Marie Eve Sylvestre Nicholas Blomley and Céline Bellot examine the court imposed territorial restrictions and other bail and sentencing conditions that are increasingly issued in the context of criminal proceedings Drawing on extensive fieldwork with legal actors in the criminal justice system as well as those who have been subjected to court surveillance the authors demonstrate the devastating impact these restrictions have on the marginalized populations the homeless drug users sex workers and protesters who depend on public spaces On a broader level the authors show how red zones unlike better publicized forms of spatial regulation such as legislation or policing strategies create a form of legal territorialization that threatens to invert traditional expectations of justice and reshape our understanding of criminal law and punishment

Historical Dictionary of the Crusades Corliss K. Slack, 2013-05-09 The crusades were among the longest and most bitter wars in human history and consisted of no less than seven major expeditions from Western Europe from the late 11th to the early 14th centuries for the purpose of wresting Jerusalem and the Holy Land from the control of the Muslims In the end it was the Muslims who won and the Christians who suffered a major setback and the Middle East remained firmly in Muslim hands This was one of the worst clashes between different religions and civilizations and for long it was largely forgotten or brushed over That is no longer the case with many Muslims regarding Western interference in the region as a repeat of the crusades while launching their own jihads So while an old conflict it is still with us today Even at the time it was very hard to understand the causes and outcome of the crusades and that remains a problem today This *Historical Dictionary of the Crusades* cannot claim to have resolved it but it most definitely does make the situation easier to understand The introduction provides an overview tracing the crusades from one expedition to the next and assessing their impact The actual flow of events is far easier to follow thanks to the chronology And maps help to trace the events geographically The entries and there are more than 300 of them in this second edition look more closely at notable figures including Pope Gregory VII Richard the lionhearted and Saladin as well as important places Jerusalem Constantinople and others events battles and sieges as well as the use of weapons and armor The bibliography points to further reading *Journal of the Royal Society of Arts* Royal Society of Arts (Great Britain), 1901 *The Computer Supported Collaborative Learning (CSCL) Conference 2013, Volume 2* ISLS, 2014-04-23 The Computer Supported Collaborative Learning CSCL Conference 2013 proceedings
