Geology Final Exam Answers:

Bretz's Flood John Soennichsen, 2010-06-01 The masterful story of the scientific rebel who dared to think outside the box and changed the course of geologic history The land between Idaho and the Cascade Mountains is characterized by gullies coulees and deserts in geologic terms it is a wholly unique place on the earth In the 1920s legendary geologist and professor J Harlen Bretz peered back in time to answer the riddle of how this land came to be becoming one of the first people to explore the area Defying the conventional wisdom of his peers Bretz saw a landscape that had been instantly scoured by a flood of unprecedented scale Though met with public and academic humiliation his theory sounded too much like the biblical flood Bretz persevered and went on to discover what everyone else had failed to see Bretz's Flood tells the dramatic story of this scientific maverick how he came to study the region his radical theory that a huge flood created it and how the mainstream geologic community campaigned to derail him from pursuing an idea that satellite photos would confirm decades later

Teaching Geology Using the History and Philosophy of Science Glenn Dolphin, 2024-10-02 This book provides a case study on how to design and build an introductory geology course for non science majors The book presents a foundation with the status of geoscience education and research in geoscience conceptual development as a backdrop for the design process It then describes the instructional goal setting process and development of the structural components of the course based on the determined goals The book presents the three historical narratives the earth is a historical entity the earth is very old and the earth is dynamic that form the foundation of instruction It also describes examples of the implicit explicit and reflective treatments of the nature of science to help student develop a better sense of the process of geology Finally the book gives preliminary results from some innovative approaches to research on student learning within the domains of geological content knowledge and NOS content knowledge within the course The Hidden Curriculum - Faculty Made Tests in Science Sheila Tobias, 1997
