**Commerce Business Daily** ,2000 *Energy Research Abstracts* ,1988 **Proceedings of the ASME Fluids Engineering Division** ,2001 **The New Rosetta Targets** Luigi Colangeli,Elena Mazzotta Epifani,Pasquale Palumbo,2013-11-08 This volume collects papers presented as invited and contributed talks or posters at the workshop on The NEW Rosetta targets Observations simulations and instrument performances which was held in Capri on October 13 15 2003 More than 100 scientists covering different fields such as optical and radio astronomy laboratory experiments and modelling

of comet physics and processes as well as several Principal Investigators of the instruments on board Rosetta participated to this highly interdisciplinary workshop. The Rosetta mission was programmed for launch in January 2003 towards the short period comet 46P Wirtanen and the asteroids 140 Siwa and 4979 Otawara. However due to problems with the Ariane V launcher the launch was postponed and the European Space Agency had to identify new mission targets suitable for a launch window at the end of February 2004. The short period comet 67P Churyumov Gerasimenko was chosen as primary target for the new baseline together with one or two asteroids to be selected depending on the  $v$  available after the Rosetta probe interplanetary orbit insertion. After the successful launch of the mission on March 2nd 2004 the new baseline foresees a double flyby with asteroids 21 Lutetia and 2867 Steins on the way towards the rendezvous with the primary target that will be reached in 2014. The papers included in this volume cover different complementary fields: observations of the new Rosetta targets, laboratory experiments, theoretical simulation of comet environment and processes, performances of the experiments on board Rosetta spacecraft also in view of the new mission targets.

After the postponement of the mission launch, comet 67P Churyumov Gerasimenko was the subject of an intense observation campaign between February and June 2003. **Newsletter**, 1984
