Governance By Indicators Global Power Through Quantification And Rankings:

Governance by Indicators Kevin Davis, Angelina Fisher, Benedict Kingsbury, Sally Engle Merry, 2012-07-05 The use of indicators as a technique of global governance is increasing rapidly Major examples include the World Bank's Doing Business Indicators the World Bank's Good Governance and Rule of Law indicators the Millennium Development Goals and the indicators produced by Transparency International Human rights indicators are being developed in the UN and regional and advocacy organizations The burgeoning production and use of indicators has not however been accompanied by systematic comparative study of or reflection on the implications possibilities and pitfalls of this practice This book furthers the study of these issues by examining the production and history of indicators as well as relationships between the producers users subjects and audiences of indicators It also explores the creation use and effects of indicators as forms of knowledge and as mechanisms of making and implementing decisions in global governance Using insights from case studies empirical work and theoretical approaches from several disciplines the book identifies legal policy and normative implications of the production and use of indicators as a tool of global governance

Governance by Indicators Kevin Davis, 2012-07-05 Indicators and rankings are widely used by governments and organisations to assess the effectiveness efficiency and success of policy decisions This book evaluates the creation of indicators their impact on policy decisions and the implications of their use

Research Handbook on Global Administrative Law Sabino Cassese, 2016-02-27 This Handbook explores the main themes and topics of the emerging field of Global Administrative Law with contributions by leading scholars and experts from universities and organizations around the world The variety of the subjects addressed and the internationality of the Handbook's perspectives make for a truly global and multi dimensional view of the field The book first examines the growth of global administrations their interactions within global networks the emergence of a global administrative process and the development of the rule of law and democratic principles at a global level It goes on to illustrate the relationship between global law and other legal orders with particular attention to regional systems and national orders The final section devoted to the emergence of a global legal culture brings the book full circle by identifying the growth of a global epistemic community The *Research Handbook on Global Administrative Law* provides a contemporary overview of the nascent field in detailed yet accessible terms making it a valuable book for university courses Academics and scholars with an interest in international law administrative law public law and comparative law will find value in this book as well as legal professionals involved with international and supranational organizations and national civil servants dealing with supranational organizations

Research Handbook on Modern Legal Realism Shauhin Talesh, Elizabeth Mertz, Heinz Klug, 2021-03-26 This insightful *Research Handbook* provides a definitive overview of the New Legal Realism NLR movement reaching beyond historical and national boundaries to form new conversations Drawing on deep roots within the law and society tradition it demonstrates the powerful virtues of new legal realist research and its attention to the challenges of translation between

social science and law It explores an impressive range of contemporary issues including immigration policing globalization legal education and access to justice concluding with an examination of how different social science disciplines intersect with NLR

Necrogeopolitics Caroline Alphin, François Debrix, 2019-10-08 Necrogeopolitics On Death and Death Making in International Relations brings together a diverse array of critical IR scholars political theorists critical security studies researchers and critical geographers to provide a series of interventions on the topic of death and death making in global politics Contrary to most existing scholarship this volume does not place the emphasis on traditional sources or large scale configurations of power force leading to death in IR Instead it details theorizes and challenges more mundane perhaps banal and often ordinary modalities of violence perpetrated against human lives and bodies and often contributing to horrific instances of death and destruction Concepts such as slow death soft killing superfluous bodies or extra ordinary destruction disappearance are brought to the fore by prominent voices in these fields alongside more junior creative thinkers to rethink the politics of life and death in the global polity away from dominant IR or political theory paradigms about power force and violence The volume features chapters that offer thought provoking reconsiderations of key concepts theories and practices about death and death making along with other chapters that seek to challenge some of these concepts theories or practices in settings that include the Palestinian territories Brazilian cities displaced population flows from the Middle East sites of immigration policing in North America and spaces of welfare politics in Scandinavian states

Governing Public Health Mark L Flear, 2015-07-30 This book contributes towards EU studies and the growing discourse on law and public health It uses the EU's governance of public health as a lens through which to explore questions of legal competence and its development through policy and concrete techniques processes and practices risk and security human rights and bioethics accountability and legitimacy democracy and citizenship and the nature essence and future trajectory of the European integration project These issues are explored first by situating the EU's public health strategy within the overarching architecture of governance and subsequently by examining its operationalisation in relation to the key public health problems of cancer HIV AIDS and pandemic planning The book argues that the centrality and valorisation of scientific and technical knowledge and expertise in the EU's risk based governance means that citizen participation in decision making is largely marginalised and underdeveloped and that this must change if public health and the quality accountability and legitimacy of EU governance and its regulation are to be improved Subsequently the book goes on to argue that the legitimating discourses of ethics and human rights and the developing notion of EU supra stewardship responsibility can help to highlight the normative dimensions of governance and its interventions in public health These discourses and dimensions provide openings and possibilities for citizens to power technologies of participation and contribute important supplementary knowledge to decision making

Jurisprudence in a Globalized World Jorge Luis Fabra-Zamora, 2020-02-28 Leading legal scholars and philosophers provide a breadth of perspectives and inspire stimulating debate around the transformations of

jurisprudence in a globalized world This innovative book considers modifications to jurisprudence's methodological approaches driven by globalization the concepts and theoretical tools required to account for putative new forms of legal phenomena and normative issues relating to the legitimacy and democratic character of these legal orders *After Public Law* Cormac Mac Amhlaigh, Claudio Michelon, Neil Walker, 2013-05-09 Public law has been conceived in many different ways sometimes overlapping often conflicting However in recent years a common theme running through the discussions of public law is one of loss What function and future can public law have in this rapidly transforming landscape where globalized states and supranational institutions have ever increasing importance The contributions to this volume take stock of the idea concepts and values of public law as it has developed alongside the growth of the modern state and assess its continued usefulness as a distinct area of legal inquiry and normativity in light of various historical trends and contemporary pressures affecting the global configuration of law in general Divided into three parts the first provides a conceptual philosophical and historical understanding of the nature of public law the nature of private law and the relationship between the public the private and the concept of law The second part focuses on the domains values and functions of public law in contemporary state legal practice as seen in part through its relationship with private domains values and functions The final part engages with the new legal scholarship on global transformation analysing the changes in public law at the national level including the new forms of interpenetration of public and private in the market state as well as exploring the ubiquitous use of public law values and concepts beyond the state The Complexity of Human Rights Philip Alston, 2024-02-08 This book provides the first systematic assessment from a human rights law perspective of the landmark contributions of the renowned legal anthropologist Sally Engle Merry What impact does oversimplification have on human rights debates The understandable tendency to present them as a single universal and immutable concept ignores their complexity and by extension only serves to weaken them Merry and her colleagues transformed human rights thinking by highlighting the process of vernacularization which sees rights discourse as being unavoidably dependent upon translation and interpretation She also warned of the pitfalls of excessive reliance upon statistical and other indicators through the process of quantification Here the leading voices in the field assess the significance of these contributions The Oxford Handbook of the Theory of International Law Anne Orford, Florian Hoffmann, Martin Clark, 2016 Histories Approaches Regimes and doctrines Debates Measuring Peace Richard Caplan, 2019-04-25 How can we know if the peace that has been established following a civil war is a stable peace More than half of all countries that experienced civil war since World War II have suffered a relapse into violent conflict in some cases more than once Meanwhile the international community expends billions of dollars and deploys tens of thousands of personnel each year in support of efforts to build peace in countries emerging from violent conflict This book argues that efforts to build peace are hampered by the lack of effective means of assessing progress towards the achievement of a consolidated peace Rarely if ever do peacebuilding organizations and governments seek to

ascertain the quality of the peace that they are helping to build and the contribution that their engagement is making or not to the consolidation of peace More rigorous assessments of the robustness of peace are needed These assessments require clarity about the characteristics of and the requirements for a stable peace This in turn requires knowledge of the local culture local history and the specific conflict dynamics at work in a given conflict situation Better assessment can inform peacebuilding actors in the reconfiguration and reprioritization of their operations in cases where conditions on the ground have deteriorated or improved To build a stable peace it is argued here it is important to take the measure of peace The Great Property Fallacy Frank K. Upham, 2018-01-25 In this groundbreaking book Frank K Upham uses empirical analysis and economic theory to demonstrate how myths surrounding property law have blinded us to our own past and led us to demand that developing countries implement policies that are mistaken and impossible Starting in the 16th century with the English enclosures and ending with the World Bank's recent attempt to reform Cambodian land law while moving through 19th century America postwar Japan and contemporary China Upham dismantles the virtually unchallenged assertion that growth cannot occur without stable legal property rights and shows how rapid growth can come only through the destruction of pre existing property structures and their replacement by more productive ones He argues persuasively for the replacement of Western myths and theoretical simplifications with nuanced approaches to growth and development that are sensitive to complexity and difference and responsive to the political and social factors essential to successful broad based development

China's Education Policy Review (2018-2021) Zhenguo Yuan, Shuangye Chen, Li You, 2024-07-26 China's Education Policy Review 2018-2021 collects important researches of China's education policies mainly conducted by the academics at East China Normal University ECNU in recent years The book covers various aspects of educational policy studies in China including Regulatory Policies on Private Supplementary Tutoring in China Accelerated Move for AI Education in China New Higher Education Policy non governmental education etc It showcases the significant contributions to scholarship in education policies studies in China This book is the eighth volume of the WSPC ECNU Series on China This series is jointly launched by World Scientific Publishing the most reputable English academic publisher in Asia and ECNU a top University in China with a long history of exchanges with the international academic community **The Oxford Handbook of Global Policy and Transnational Administration** Diane Stone, Kim Moloney, 2019-01-10 Global policy making is unfurling in distinctive ways above traditional nation state policy processes New practices of transnational administration are emerging inside international organizations but also alongside the trans governmental networks of regulators and inside global public private partnerships Mainstream policy and public administration studies have tended to analyse the capacity of public sector hierarchies to globalize national policies By contrast this Handbook investigates new public spaces of transnational policy making the design and delivery of global public goods and services and the interdependent roles of transnational administrators who move between business bodies government agencies international organizations and professional

associations This Handbook is novel in taking the concepts and theories of public administration and policy studies to get inside the black box of global governance Transnational administration is a multi actor and multi scalar endeavour having manifestations depending on the policy issue or problems at the local urban sub regional sub national regional national supranational supra regional transnational international and global scales These scales of local and global are not neatly bounded and nested spaces but are articulated together in complex patterns of policy activity These transnational patterns represent a reinvigoration of public administration and policy studies as the Handbook authors advance their analysis beyond the methodological nationalism of the nation state

A Cosmopolitan Jurisprudence Helge Dedek,2021-12-16 Inspired by comparative law scholar Patrick Glenn s work an international group of legal scholars explores the state of the discipline

Palaces of Hope Ronald Niezen,Maria Sapiñoli,2017-01-26 This volume assembles in one place the work of scholars who are making key contributions to a new approach to the United Nations and to global organizations and international law more generally Anthropology has in recent years taken on global organizations as a legitimate source of its subject matter The research that is being done in this field gives a human face to these world reforming institutions Palaces of Hope demonstrates that these institutions are not monolithic or uniform even though loosely connected by a common organizational network They vary above all in their powers and forms of public engagement Yet there are common threads that run through the studies included here the actions of global institutions in practice everyday forms of hope and their frustration and the will to improve confronted with the realities of nationalism neoliberalism and the structures of international power

Manufacturing Political Trust Christina Boswell,2018-03-01 Measurement and targets have been widely criticised as distorting policy and engendering gaming yet they continue to be widely used in government This book offers an original new account explaining the persistent appeal of performance measurement It argues that targets have been adopted to address a crisis of trust in politics through creating more robust mechanisms of accountability and monitoring The book shows that such tools rarely have their intended effect Through an in depth analysis of UK targets on immigration and asylum since 2000 it shows that far from shoring up trust targets have engendered cynicism and distrust in government Moreover they have encouraged intrusive forms of monitoring and reform in public administration with damaging consequences for trust between politicians and civil servants Despite these problems performance measurement has now become embedded in techniques of public management It has also become normalised as a way of framing policy problems and responses Thus despite their acknowledged problems targets are likely to retain their allure as techniques of political communication and governance

Southernising Criminology Luiz Dal Santo,Carla Sepúlveda Penna,2024-06-03 This book introduces the Southern criminology movement explores its theoretical methodological and philosophical tools offers analytical accounts on the development of criminological thoughts in marginalised regions and showcases the cutting edge of criminological research from Southern settings Southernising Criminology is structured into three parts The first

part provides theoretical and methodological insights into how criminology can be Southernised including renowned social scientists who share concerns for the need to reconceptualise the centre the periphery and their relations The second part brings the reader up to date with the state of criminological research in different parts of the world and how far this landscape has changed when introducing Southern perspectives The third part shows first hand examples of how Southern criminology is done with its challenges and transformative potential for criminological knowledge Bringing together contributions from leading scholars working across the five continents and drawing on issues such as state criminality violent crime criminal justice practices and state and non state punishment this book offers a critical account of the problems of metropolitan thinking colonial and imperial power relations and Western ethnocentric approaches to criminology It offers a nuanced and grounded reflection on how things are being done differently and why that is important An accessible and compelling read this book will appeal to students and scholars of criminology sociology politics and policy makers from around the world who are interested in the field of criminology and are aware of the urgent need for it to be decolonised and democratised
