**Canada: The State of the Federation 2015** John R. Allan, David L.A. Gordon, Kyle Hanniman, André Juneau, 2018-05-31  
Renewing and expanding national infrastructure is critical to the wellbeing and productivity of Canadians and is one of the foremost challenges confronting our federal provincial and municipal governments Not only are the required investments dauntingly large for all three levels of government but so too is the required level of intergovernmental cooperation if our goals are to be realized The 2015 State of the Federation volume advances our understanding of these infrastructure challenges and identifies how best to resolve them The contributors to the volume provide historical or international comparative perspectives and utilize legal economic or administrative approaches to examine the nature and magnitude of the so called infrastructure deficit and the question of how best to finance the necessary investments The possible roles played by deficits and debt are considered together with options such as public private partnerships and asset recycling and a possible Aboriginal resource tax to finance the on reserve infrastructure needs of First Nations Considerable attention is also paid to pricing the use of infrastructure both to achieve efficiency in use and to avoid excess demand and an exaggerated perception of the required level of investment Other contributors examine the infrastructure investment decision processes at the federal and provincial levels and consider the optimal allocation of responsibility for infrastructure investments among the different levels of government and the related issue of the role of intergovernmental transfers to underwrite this allocation

Studies in Comparative Federalism, Australia, Canada, the United States, and West Germany Richard H. Leach, 1981 When insurgent groups challenge powerful states defeat is not always inevitable Increasingly guerrilla forces have overcome enormous disadvantages and succeeded in extending the period of violent conflict raising the costs of war and occasionally winning Noriyuki Katagiri investigates the

circumstances and tactics that allow some insurgencies to succeed in wars against foreign governments while others fail. Adapting to Win examines almost 150 instances of violent insurgencies pitted against state powers including in depth case studies of the war in Afghanistan and the 2003 Iraq war. By applying sequencing theory Katagiri provides insights into guerrilla operations ranging from Somalia to Benin and Indochina demonstrating how some insurgents learn and change in response to shifting circumstances. Ultimately his research shows that successful insurgent groups have evolved into mature armed forces and then demonstrates what evolutionary paths are likely to be successful or unsuccessful for those organizations. *The Routledge Handbook of Dehumanization* Maria Kronfeldner, 2021-02-25 A striking feature of atrocities as seen in genocides civil wars or violence against certain racial and ethnic groups is the attempt to dehumanize to deny and strip human beings of their humanity. Yet the very nature of dehumanization remains relatively poorly understood. The Routledge Handbook of Dehumanization is the first comprehensive and multidisciplinary reference source on the subject and an outstanding survey of the key concepts issues and debates within dehumanization studies. Organized into four parts the Handbook covers the following topics: The history of dehumanization from Greek Antiquity to the 20th century contextualizing the oscillating boundaries dimensions and hierarchies of humanity in the history of the West. How dehumanization is contemporarily studied with respect to special contexts as part of social psychology as part of legal studies or literary studies and how it connects to the idea of human rights disability and eugenics the question of animals and the issue of moral standing. How to tackle its complex facets with respect to the perpetrator's and the target's perspective metadehumanization and selfdehumanization rehumanization social death status and interdependence as well as the fear we show toward robots that become too human for us. Conceptual and epistemological questions on how to distinguish different forms of dehumanization and neighboring phenomena on why dehumanization appears so paradoxical and on its connection

to hatred essentialism and perception Essential reading for students and researchers in philosophy history psychology and anthropology this Handbook will also be of interest to those in related disciplines such as politics international relations criminology legal studies literary studies gender studies disability studies or race and ethnic studies as well as readers from social work political activism and public policy
