2000 is reviewed according to five main categories land use transportation LUT cellular automata urban system dynamics agent based models ABMs and spatial economics econometric models SE EMs Within South Africa urban modelling initiatives are categorised differently and include a broader range of urban modelling techniques Typologies used include provincial government modelling initiatives in Gauteng municipal government modelling initiatives other government funded modelling research and academic modelling research The various modelling initiatives described are by no means a comprehensive review of all urban spatial change modelling projects in South Africa but provide a broad indication of the types of urban spatial change modelling underway Importantly the models may form the basis for more accurate and sophisticated urban modelling projects in the future The paper concludes by identifying key urban modelling opportunities and challenges for short to long term planning in the GCR and South Africa Cape peninsula South Africa.
