*Science Education in Canada* Christine D. Tippet, Todd M. Milford, 2019-07-01 This book offers a meso level description of demographics science education and science teacher education Representing all 13 Canadian

jurisdictions the book provides local insights that serve as the basis for exploring the Canadian system as a whole and function as a common starting point from which to identify causal relationships that may be associated with Canada's successes. The book highlights commonalities, consistencies and distinctions across the provinces and territories in a thematic analysis of the 13 jurisdiction specific chapters. Although the analysis indicates a network of policy and practice issues warranting further consideration, the diverse nature of Canadian science education makes simple identification of causal relationships elusive. Canada has a reputation for strong science achievement. However, there is currently limited literature on science education in Canada at the general level or in specific areas such as Canadian science curriculum or science teacher education. This book fills that gap by presenting a thorough description of science education at the provincial/territorial level as well as a more holistic description of pressing issues for Canadian science education.

**Socio-Life Science and the COVID-19 Outbreak** Makoto Yano, Fumihiko Matsuda, Anavaj Sakuntabhai, Shigeru Hirota, 2021-11-30. This open access book presents the first step towards building socio-life science, a field of science investigating humans in such a way that both social and life scientific factors are integrated. Because humans are both living and social creatures, a human action can never be understood fully without knowing both the biological traits of a person and the social scientific environments in which he exists. With this consideration, the editors of this book have initiated a research project promoting a deeper and more integrated understanding of human behavior and human health. This book aims to show what can and could be achieved through our interdisciplinary project. One important product is the newly formed three-party collaboration between Pasteur Institute, Kyoto University and the Research Institute of Economy, Trade and Industry. Covering many different fields including medicine, epidemiology, anthropology, economics, sociology, demography, geography and policy, researchers in these institutes and many others present their studies on the COVID-19 pandemic. Although based on different methodologies, the studies show the importance of behavioral change and governmental policy in the fight against a huge pandemic. The book explains the unique genome cohort panel data that the project builds to study social and life scientific aspects of humans.

*International Conference on Education and Management Science (ICEMS2014)*, 2014-09-24. 2014 International Conference on Education and Management Science (ICEMS2014) will be held in Beijing, China, on August 19-20, 2014. The main purpose of this conference is to provide a common forum for researchers, scientists and students from all over the world to present their recent findings, ideas, developments and application in the border areas of Education and Management Science. It will also report progress and development of methodologies, technologies, planning and implementation tools and standards in information systems. Education is an internal topic. It is a process of delivering knowledge in a basic meaning. Humans are hard to define, the actual definition of education. But it is the key point for our society to step forward. Management science is the discipline that adapts the scientific approach for problem solving to help managers making informed decisions. The goal of management science is to recommend the course of action that is expected to yield the best outcome with what is available.

Norris, Linda M. Phillips, 2015-03-16 This book specifies the foundation for Adapted Primary Literature APL a novel text genre that enables the learning and teaching of science using research articles that were adapted to the knowledge level of high school students More than 50 years ago J J Schwab suggested that Primary Scientific Articles afford the most authentic unretouched specimens of enquiry that we can obtain and raised for the first time the idea that such articles can be used for enquiry into enquiry This book the first to be published on this topic presents the realization of this vision and shows how the reading and writing of scientific articles can be used for inquiry learning and teaching It provides the origins and theory of APL and examines the concept and its importance It outlines a detailed description of creating and using APL and provides examples for the use of the enactment of APL in classes as well as descriptions of possible future prospects for the implementation of APL Altogether the book lays the foundations for the use of this authentic text genre for the learning and teaching of science in secondary schools     *Accountability in education: meeting our commitments* UNESCO, 2017-10-30 The second edition of the Global Education Monitoring Report GEM Report presents the latest evidence on global progress towards the education targets of the UN Sustainable Development Goals With hundreds of millions of people still not going to school and many not achieving minimum skills at school it is clear education systems are off track to achieve global goals The marginalized currently bear the most consequences but also stand to benefit the most if policy makers pay sufficient attention to their needs Faced with these challenges along with tight budgets and increased emphasis on results oriented value for money countries are searching for solutions Increased accountability often tops the list The 2017 8 GEM Report shows the entire array of approaches to accountability in education It ranges from countries unused to the concept where violations of the right to education go unchallenged to countries where accountability has become an end in itself instead of a means to inclusive equitable and high quality education and lifelong learning for all The report emphasizes that education is a shared responsibility While governments have primary responsibility all actors schools teachers parents students international organizations private sector providers civil society and the media 0 3 have a role in improving education systems The report emphasized the importance of transparency and availability of information but urges caution in how data are used It makes the case for avoiding accountability systems with a disproportionate focus on narrowly defined results and punitive sanctions In an era of multiple accountability tools the report provides clear

evidence on those that are working and those that are not Back cover
