Preventing Bullying Through Science, Policy, and Practice National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Division of Behavioral and Social Sciences and Education, Committee on Law and Justice, Board on Children, Youth, and Families, Committee on the Biological and Psychosocial Effects of Peer Victimization: Lessons for Bullying Prevention, 2016-09-14 Bullying has long been tolerated as a rite of passage among children and adolescents There is an implication that individuals who are bullied must have asked for this type of treatment or deserved it Sometimes even the child who is bullied begins to internalize this idea For many years there has been a general acceptance and collective shrug when it comes to a child or adolescent with greater social capital or power pushing around a child perceived as subordinate But bullying is not developmentally appropriate it should not be considered a normal part of the typical social grouping that occurs throughout a child s life Although bullying behavior endures through generations the milieu is changing Historically bullying has occurred at school the physical setting in which most of childhood is centered and the primary source for peer group formation In recent years however the physical setting

is not the only place bullying is occurring Technology allows for an entirely new type of digital electronic aggression cyberbullying which takes place through chat rooms instant messaging social media and other forms of digital electronic communication Composition of peer groups shifting demographics changing societal norms and modern technology are contextual factors that must be considered to understand and effectively react to bullying in the United States Youth are embedded in multiple contexts and each of these contexts interacts with individual characteristics of youth in ways that either exacerbate or attenuate the association between these individual characteristics and bullying perpetration or victimization Recognizing that bullying behavior is a major public health problem that demands the concerted and coordinated time and attention of parents educators and school administrators health care providers policy makers families and others concerned with the care of children this report evaluates the state of the science on biological and psychosocial consequences of peer victimization and the risk and protective factors that either increase or decrease peer victimization behavior and consequences

Effective and Equitable Teacher Practice in Mathematics and Science Education Nani Teig, Trude Nilsen, Kajsa Yang Hansen, 2024-03-19 This open access book presents original research on effective and equitable teacher practice in mathematics and science education across Nordic countries It focuses on three key aspects of teacher practice what teachers teach how teachers teach and how teachers assess their students To provide a comprehensive understanding of teacher practice data from the IEA's Trends in Mathematics and Science Study TIMSS from 2011 to 2019 was analyzed TIMSS provides large scale and representative data allowing an in depth investigation of the relations between teachers their practices and student outcomes The findings highlight the changes in teacher practice over time and the extent to which such changes explain the differences in student outcomes This research also contributes to understanding how the relationships between teacher practice and student outcomes vary across different student groups i e gender socioeconomic status and language background The empirical evidence presented not only adds a significant layer to the academic discourse but also offers practical implications These insights are crucial in facilitating educational policymaking and classroom practices aimed at improving student outcomes and closing gaps in educational inequality

Improving Reading and Reading Engagement in the 21st Century Clarence Ng, Brendan Bartlett, 2017-05-31 This book presents cutting edge research findings in areas critical to advancing reading research in the 21st century context including new literacies reading motivation strategy instruction and reading intervention studies While students reading performance is currently receiving unprecedented attention there is a lack of research that adopts an international perspective and draws on research expertise from different parts of the world to present a concerted effort discussing key research models and findings on how to improve reading education Addressing this gap in the literature the book also responds to the challenge of

promoting higher levels of literacy and supporting and developing readers who can enjoy and critique texts of every genre

Connecting Physics Education Research and Practice Italo Testa, Marisa Michelini, Salvatore Esposito, 2025-08-15

This book presents a selection of the most recent research results from the Italian physics education research community aimed at enhancing the teaching and learning of physics. The motivation for this publication arises from the lack of a comprehensive reference for teachers on research results in physics education. Despite various physics curriculum reform initiatives such as the introduction of modern physics into high school curricula, their effectiveness in improving the quality of physics teaching in schools has been limited. The book offers a contextualized view of the main topics in physics education along with a comprehensive overview of the current challenges faced by physics education in Italy and abroad. It also presents research findings that could potentially enhance students' learning of physics. Throughout the book, the implications of these studies are outlined, acknowledging issues and knowledge gaps that will guide future research in physics education. Specifically, rather than covering all the contents addressed in the physics curriculum, the book presents research contributions that suggest potentially effective strategies, methods, and practices at different school levels, from primary school to secondary school and university level. Regarding physics content, the book presents teaching proposals highlighting conceptual aspects and exemplary methodologies of interpretation in physics, such as the physics of fluids and quantum mechanics. It also includes research contributions on different methods and proposals for implementing practical activities, reflecting on the role of the laboratory in learning the discipline and providing examples of integrating experimental and cognitive skills. The book also addresses the role of affective variables, such as physics identity, self-efficacy, and attitudes toward physics in the learning process. Additionally, studies on teachers' professional development are presented, which can inform the design of proposals for educational paths and methods within a framework of close collaboration between schools and physics departments.
