DESCRIPTION

The *International Journal of Engineering Science* is not limited to a specific aspect of **science** and **engineering** but is instead devoted to a wide range of subfields in the **engineering sciences**. While it encourages a broad spectrum of contribution in the engineering sciences, its core interest lies in issues concerning material modeling and response. Articles of interdisciplinary nature are particularly welcome.

The primary goal of the **new editors** is to maintain high quality of publications. There will be a commitment to expediting the time taken for the publication of the papers. The articles that are sent for reviews will have names of the authors deleted with a view towards enhancing the objectivity and fairness of the review process.

Articles that are devoted to the purely mathematical aspects without a discussion of the physical implications of the results or the consideration of specific examples are discouraged. Articles concerning material science should not be limited merely to a description and recording of observations but should contain theoretical or quantitative discussion of the results.

From time to time, the *Journal* will publish review articles and bring out special issues on a specific sub-field of engineering science. Authors are encouraged to contact the Editors if they would like to **submit** a review article or bring out a special issue of the *Journal*.

The Editors reserve the right to reject papers without sending them out for review.
