Cognitive Aphasiology - A Usage-Based Approach to Language in Aphasia Rachel Hatchard,2021-10-15 Aphasia is the most common acquired language disorder in adults resulting from brain damage usually stroke This book firstly explains how aphasia research and clinical practice remain heavily influenced by rule based generative theory and summarizes key shortcomings with this approach Crucially it demonstrates how an alternative the constructivist usage based approach can

provide a more plausible theoretical perspective for characterizing language in aphasia After detailing rigorous transcription and segmentation methods it presents constructivist usage based analyses of spontaneous speech from people with various aphasia types challenging a clear cut distinction between lexis and grammar emphasizing the need to consider whole form storage and frequency effects beyond single words and indicating that individuals fall along a continuum of spoken language capability rather than differing categorically by aphasia type It provides original insight into aphasia with wide reaching implications for clinical practice while equally highlighting how the study of aphasia is important for the development of Cognitive Linguistics **Cadence** ,1998
