[Endocrine and Metabolic Effects on Maternal-fetal and Neonatal Outcomes](#) Huixia Yang,Moshe Hod,Jie Yan,Cuilin Zhang,2024-07-10 Pregnancy is a complex state with many endocrine and metabolic

challenges to a woman's physiology. Inappropriate maternal endocrine and metabolic changes such as obesity, hyperglycemia, hyperlipidemia, and hypothyroidism may lead to short-term and long-term complications in the mother and offspring. This not only affects population health but also imposes a huge social and economic burden accompanied by significant direct and indirect public health costs. Therefore, the study of endocrine and metabolic effects on maternal, fetal, and neonatal outcomes is an especially important research field. These studies will lead to new approaches to predicting metabolic diseases in pregnancy and provide new solutions and effective interventions to prevent or delay those related diseases. Furthermore, they will reveal unknown pathophysiological mechanisms of inappropriate maternal endocrine and metabolic changes during pregnancy and their implications on short-term and long-term complications in the mother and offspring. This could lead to updated diagnosis and treatment strategies for women with endocrine and metabolic diseases during pregnancy. The proposed Research Topic intends to evaluate the pathophysiological mechanisms of inappropriate maternal endocrine and metabolic changes during pregnancy and their implications on short-term and long-term complications in the mother and offspring. The evolving trends in prediction, diagnosis, prevention, and treatment strategies of endocrine and metabolic diseases during pregnancy are also encouraged. In addition, the goal of this research topic is to uncover the characteristics of maternal endocrine and metabolic changes in special populations like twins, women with obesity, gestational diabetes mellitus, pregnancy hypothyroidism, etc.

[The Ancient Story of God-With-Us](#) Ray C. Robles, 2025-04-08. What is forming you? We often assume that our identities are formed and created only when we intend them to be. But what if our quest for discerning the deepest truths about ourselves, our God, and our world are already governed by appetites and ways of thinking that are so fixed in our collective imaginations we don't even know that they're there? This book is aimed at exposing those hidden assumptions that have kept us feeling like God is distant while we remain divided, anxious, and afraid despite our best efforts to overcome through private prayer and Bible reading. The Ancient Story of God With Us is about the good news that you don't have to think or pray your way out of this wilderness by yourself. Through our storied identity with God, we have been gifted deep wells from which to draw again and again as the Spirit woos us deeper into the inexhaustible mystery of the triune God with us. God is alive. We have nothing to fear.
