PAPER 1****JUNE 2019: MEMORANDUM****MARKS: 150****MARKING PRINCIPLES:**

1. Penalties for foreign items are applied only if the candidate is not losing marks elsewhere in the question for that item (no penalty for misplaced item). No double penalty applied.
2. Penalties for placement or poor presentation (e.g. details) are applied only if the candidate is earning marks on the figures for that item.
3. Full marks for correct answer. If answer incorrect, mark the workings provided.
4. If a pre-adjustment figure is shown as a final figure, allocate the part-mark for the working for that figure (not the method mark for the answer).
5. Unless otherwise indicated, the positive or negative effect of any figure must be considered to award the mark. If no + or – sign or bracket is provided, assume that the figure is positive.
6. Where indicated, part-marks may be awarded to differentiate between differing qualities of answers from candidates.
7. Where penalties are applied, the marks for that section of the question cannot be a final negative.
8. Where method marks are awarded for operation, the marker must inspect the reasonableness of the answer and at least one part must be correct before awarding the mark.
9. In awarding method marks, ensure that candidates do not get full marks for any item that is incorrect at least in part.
10. Be aware of candidates who provide valid alternatives beyond the marking guideline.
11. Codes: f = foreign item; p = placement/presentation.

This marking guideline consists of 08 pages.

Novel Diagnostic and Therapeutic Strategies in the Management of Cerebral Gliomas Valeria Barresi,Maria Caffo,Giuseppe Lombardi,Letteria Minutoli,Emeline Tabouret ,Herui Wang,2024-10-29

Cerebral gliomas account for 45% of all primary central nervous system CNS tumors The median survival after the initial diagnosis of glioblastoma GBM is only 15 months and less than 10% of patients survive three years post diagnosis Surgical treatment followed by adjuvant therapies such as radiotherapy and chemotherapy represents the classical strategy in glioma management The revised WHO 2016 classification now distinguishes the oligodendrogliomas with 1p19q codeletion and IDH mutation from the astrocytomas with or without IDH mutations thereby creating homogenous and pathologically distinct subgroups While the status of gene expression and mutations define components of GBM subtypes it was also found that response to therapies was different for each subtype suggesting that personalized treatment based on genomic alterations could lead to a more favorable outcome for this disease

#### **Executive Function and Education** Mariëtte Huizinga,Dieter

Baeyens,Jacob A. Burack,2018-09-21 Executive function is an umbrella term for various cognitive processes that are central to goal directed behavior thoughts and emotions These processes are especially important in novel or demanding situations which require a rapid and flexible adjustment of behavior to the changing demands of the environment The development of executive function relies on the maturation of associated brain regions as well as on stimulation in the child s social contexts especially the home and school Over the past decade the term executive function has become a buzzword in the field of education as both researchers and educators underscore the importance of skills like goal setting planning and organizing in academic success Accordingly in initiating this Research Topic and eBook our goal was to provide a forum for state of the art theoretical and empirical work on this that both facilitates communication among researchers from diverse fields and provides a theoretically sound source of information for educators The contributors to this volume who hail from several different countries in Europe and North America have certainly accomplished this goal in their nuanced and cutting edge depictions of the complex links among various executive function components and educational success

*Beyond Age Effects in Instructional L2 Learning* Simone E. Pfenninger,David Singleton,2017-04-21 This book constitutes a holistic study of how and why late starters surpass early starters in comparable instructional settings Combining advanced quantitative methods with individual level qualitative data it examines the role of age of onset in the context of the Swiss multilingual educational system and focuses on performance at the beginning and end of secondary school thereby offering a long term view of the teenage experience of foreign language learning The study scrutinised factors that seem to prevent young starters from profiting from their extended learning period and investigated the mechanisms that enable late beginners to catch up with early beginners relatively quickly Taking account of contextual factors individual socio affective factors and instructional factors within a single longitudinal study the book makes a convincing case that age of onset is not only of minimal relevance for many aspects of instructed language acquisition but that in this context for a number of reasons a later onset can be beneficial

**Implementation of Large-Scale Education Assessments** Petra Lietz,John C. Cresswell,Keith F. Rust,Raymond J. Adams,2017-04-24 Presents a comprehensive treatment of issues related to the inception design implementation and reporting of large scale education assessments In recent years many countries have decided to become involved in international educational assessments to allow them to ascertain the strengths and weaknesses of their student populations Assessments such as the OECD's Programme for International Student

Assessment PISA the IEA's Trends in Mathematics and Science Study TIMSS and Progress in International Reading Literacy Study PIRLS have provided opportunities for comparison between students of different countries on a common international scale. This book is designed to give researchers, policy makers and practitioners a well grounded knowledge in the design, implementation, analysis and reporting of international assessments. Readers will be able to gain a more detailed insight into the scientific principles employed in such studies allowing them to make better use of the results. The book will also give readers an understanding of the resources needed to undertake and improve the design of educational assessments in their own countries and regions.

**Implementation of Large Scale Education Assessments** Brings together the editors' extensive experience in creating, designing, implementing, analysing and reporting results on a wide range of assessments. Emphasizes methods for implementing international studies of student achievement and obtaining high quality data from cognitive tests and contextual questionnaires. Discusses the methods of sampling, weighting and variance estimation that are commonly encountered in international large scale assessments. Provides direction and stimulus for improving global educational assessment and student learning. Is written by experts in the field with an international perspective.

Survey researchers, market researchers and practitioners engaged in comparative projects will all benefit from the unparalleled breadth of knowledge and experience in large scale educational assessments gathered in this one volume.

**Novel biomarkers for anticancer therapy** Hongtao Xiao, Zhe-Sheng Chen, Liang Ouyang, Ting Wang, Chen Shi, 2023-02-07 *Journal of Research on Organization in Education*

Curt M. Adams, Timothy G. Ford, Angela M. Urick, 2018-08-01 *Journal of Research on Organization in Education*

The JROE represents a new forum for advancing, integrating and challenging the theory and body of evidence surrounding the organization of education. Committed to scientific empiricism, this journal's editors and editorial board seek to coalesce and vitalize decades of theoretical work and research that holds promise for our understanding and improvement of organizations, especially but not only schools. The development and testing of a body of middle range theory is facilitated by the availability of longitudinal and hierarchical analytical techniques, model building and experimental simulation research approaches, all potentially signaling a new era of theoretical possibility. Increasingly, a new generation of researchers studying education organization is prepared to exploit the power of these tools. JROE can serve as scaffold for holding more precise empirical evidence and orienting it toward theory building.

**Innovation and Trends in the Global Food Systems, Dietary Patterns and Healthy Sustainable Lifestyle in the Digital Age, 2nd edition** Maha Hoteit, Reema Fayezy Tayyem, Radwan Qasrawi, Haleema Al Sabbah, 2023-07-31

All aspects of feeding and nourishing people, growing, harvesting, packaging, processing, transporting, marketing and consuming food are part of the food system. Even before the COVID-19 pandemic, food systems faced many challenges such as hunger increases which affected up to 811 million people as of 2020, while healthy diets were unaffordable for at least 3 billion people. More than 80% of the population affected by hunger and 95% of people unable to afford a healthy diet were found in Asia and Africa. Transformation of the

global food system is clearly needed if we wish to embed equity sustainability and health as priorities in food provision and consumption. Some of these transformations will be facilitated through new technologies while others will require public policy shifts, changes in the private agro food industry, actions by civil society and behavioral changes by individuals. In this dynamic context, technology actors and the consumers they serve sit at an important nexus within the food system and have the potential to make decisions that cut across the challenges and opportunities to improve sustainable food system outcomes. Although food security has improved in developed countries, many countries, particularly low to middle income countries (LMIC), suffer from significant food insecurity challenges. In addition, food production accessibility and availability have been further impacted due to the COVID-19 outbreak, causing growing global concerns regarding food security, especially within the most vulnerable communities. Moreover, the transformation of food systems for addressing healthy nutrition, food insecurity and public health issues is a global concern. Food security and nutrition systems are directly related to human well-being and global stability, particularly in a time when diets transition toward increased reliance upon processed foods, increased fast food intake, high consumption of edible oils and sugar-sweetened beverages, lack of physical activities and increased lifestyles worldwide. These changes in lifestyle continue to contribute to the growing pandemic of non-communicable diseases such as obesity, diabetes, hypertension and cardiovascular diseases, which are clearly noticed across the globe. The study of nutrition systems, food security and the roles of technological advances, especially in LMIC, is considered the major factor in understanding food transition and population health. Physical inactivity threatens LMIC public health as it is a prime behavioral risk factor associated with major non-communicable diseases such as coronary heart disease, type 2 diabetes and breast and colon cancer. Its long-term impacts increasingly burden national economies. Decreasing its prevalence is paramount toward decreasing premature mortality and restoring healthy populations. In its most recent iteration of a global action plan for the prevention of non-communicable diseases, the World Health Organization established voluntary global targets to reduce physical inactivity by 10%. Currently, limited published systematic analysis of physical inactivity prevalence among Muslim majority countries exists. Existing literature is concentrated on Arab countries, which represent less than half of all Muslim nations. To date, however, pan-Islamic physical inactivity data have not been reported. Doing so can potentially galvanize religion-specific agencies, e.g., Islamic Relief Worldwide, Organization of Islamic Cooperation, to support efforts aimed at decreasing physical inactivity.
