without a natural interest in birds bees and bats He takes something that is so off limits and unfamiliar to humans the act of flying and puts it in the context of experiences that many readers can relate to Alexander guides readers through the anomalies of the flying world hovering hummingbirds unexpected gliders squirrels for instance and the flyers that went extinct pterosaurs Alexander also delves into wing origin theory and explores whether birds entered the skies from the trees down as gliders or from the ground up as runners and uses the latest fossil evidence to present readers with an answer
