*Forensic Intelligence and Deep Learning Solutions in Crime Investigation* Kaunert, Christian, Raghav, Anjali, Ravesangar, Kamalash, Singh, Bhupinder, 2025-02-28. The massive advancement in various sectors of technology, including forensic science, is no exception. Integration of deep learning (DL) and artificial intelligence (AI) in forensic intelligence plays a vital role in the transformational shift in the effective approach towards the investigation of crimes and solving criminal investigations with foolproof evidence. As crimes grow increasingly sophisticated, traditional investigative tactics may be inadequate to grapple with the complexities of transnational criminal organizations. DL uses scientific tools for the recognition of patterns, image and speech analysis, and predictive modeling among others, which are necessary to help solve crimes. By studying fingerprints, behavioral profiling, and DNA in digital forensics, AI-powered tools provide observations that were inconceivable before now. *Forensic Intelligence and Deep Learning Solutions in Crime Investigation* discusses the numerous potential applications of deep learning and AI in forensic science. It explores how deep learning algorithms and AI technologies transform the role that forensic scientists and investigators play by enabling them to efficiently process and analyze vast amounts of data with very high accuracy in a short duration. Covering topics such as forensic ballistics, evidence processing, and crime scene analysis, this book is an excellent resource for forensic scientists, investigators, law enforcement, criminal justice professionals, computer scientists, legal professionals, policy makers, professionals, researchers, scholars, academicians, and more.
