

20. What are the women doing with saliva and hair samples?
They are checking out the genetic fingerprint of their boyfriends to see what kind of "catch" they have made in a date, or mate.
21. What does Irene read on the printout?
Irene reads Jerome's genetic fingerprint and thinking that it is Vincent's, concludes that he is "quite a catch."
22. What DNA source incriminates Vincent?
The inspector finds an eyelash that belongs to Vincent in GATTACA.
23. Who does the crime investigator turn out to be?
The crime investigator turns out to be Anton, Vincent's brother.
24. How is Vincent finally exposed at the GATTACA spaceport?
Seconds before his flight, Vincent is asked to take a final urine test. He fails the test because he did not carry along a urine pouch with Jerome's urine.
25. Why does the doctor let him through anyway?
The doctor has a son that was not genetically what he should have been. The doctor tells Vincent that the doctor's son admires Vincent. The doctor seems to understand Vincent's dream and ambition. The doctor hints that he's known about, or been suspicious about Vincent because the doctor has been witness to Vincent's urine tests: "Right handed-men don't hold it with their left."

CONNECTIONS-SCIENCE FICTION TO FACT

1. There are many hidden meanings in the words used in this film.
What does the word GATTACA mean?
The letters are taken from the letters that represent the four nitrogenous DNA bases: A adenine, T thymine, G guanine, C cytosine.
2. How about the name Eugene? (Hint: what other biology words start with "eu?")
The name Eugene can refer to eugenics, which is the science of improvement of the human race through the application of genetics. Other biology words that start with "eu" are: eukaryotic (having a true nucleus), euchromatin (active genes), euglena (both plant and animal), and eustachian tube (the auditory canal). The root "eu" in biology means "true."
3. After watching this film, how do you think genetic screening today might affect a person's ability to get a job, or get health insurance? Explain.
If a genetic disease is discovered, it could result in higher premiums for health insurance, denial of claims because of a pre-existing condition, or denial of health insurance. Some employers may not hire people that might have a disease that results in poor attendance or becoming disabled. Some employers may not hire people they deem to be a safety risk to themselves, or the public.
