Geospatial Technologies in Environmental Management Nancy Hoalst-Pullen, Mark W. Patterson, 2010-09-27

Geotechnologies and the Environment Environmental Applications and Management presents an engaging and diverse array of physically oriented GIScience applications that have been organized using four broad themes While the book's themes are by no means mutually exclusive Hoalst Pullen and Patterson provide an elegant overview of the field that frames the collection's subsequent thematic structure Wilderness and Wildlife Response Glaciers Wetlands and Watersheds and Human Health and the Environment Over the course of the volume the contributing authors move beyond basic and in some respects clichéd landscape ecology of land use change to explore human environment dynamics heretofore not emphasized in the applied literature In doing so the collection presents a compelling case for the importance of developing new physically oriented GIScience applications that reside at the nexus of social and natural systems with the explicit intent of informing public policy and or the decision making practices of resource managers Individually the chapters themselves are intentionally diverse The diversity of the approaches their spatial context and emphases on management applications demonstrate the many ways in which geotechnologies can be used to address small and big problems in both developed and developing regions The collection's internal coherence is derived like the book series from its explicit appeal to a wide variety of human environment interactions with potential policy linkages

Geospatial Technology for Landscape and Environmental

Management Praveen Kumar Rai, Varun Narayan Mishra, Prafull Singh, 2022-01-11 Geospatial technology is a combination of

state of the art remote sensing and technology for geographic information systems GIS and global navigation satellite systems GNSS for the mapping and monitoring of landscapes and environment The main thrust of using geospatial technology is to understand the causes mechanisms and consequences of spatial heterogeneity while its ultimate objective is to provide a scientific basis for developing and maintaining ecologically economically and socially sustainable landscapes This book presents new research on the interdisciplinary applications of geospatial technology for identification assessment monitoring and modelling issues related to landscape natural resources and environmental management The book specifically focuses on the creation collection storage processing modelling interpretation display and dissemination of spatio temporal data which help to resolve environmental management issues including ecosystem change resource utilization land use management and environmental pollution The positive environmental impacts of information technology advancements with regard to global environmental and climate change are also discussed The book addresses the interests of a wide spectrum of readers who have a common interest in geospatial science geology water resource management database management planning and policy making and resource management Applications and Challenges of Geospatial Technology Pavan Kumar, Meenu Rani, Prem Chandra Pandey, Haroon Sajjad, Bhagwan Singh Chaudhary, 2018-11-24 This book advances the scientific understanding and application of space based technologies to address a variety of areas related to sustainable development including environmental systems analysis environmental management clean processes green chemistry and green engineering Geo spatial techniques have gained considerable interest in recent decades among the earth and environmental science communities for solving and understanding various complex problems and approaches towards sustainable technologies The book encompasses several scopes of interests on sustainable technologies in areas such as water resources forestry remote sensing meteorology atmospheric and oceanic modeling environmental engineering and management civil engineering air and environmental pollution water quality problems etc The book will appeal to people with an interest in geo spatial techniques sustainable development and other diverse backgrounds within earth and environmental sciences field **Harnessing AI in Geospatial Technology for Environmental Monitoring and Management**

Mobo, Froilan D., 2024-12-06 The integration of Artificial Intelligence AI with geospatial technologies is increasingly vital in addressing environmental challenges facing society today As climate change resource depletion and environmental degradation intensify AI driven geospatial tools offer powerful solutions for monitoring ecosystems predicting environmental changes and managing natural resources more effectively By harnessing AI to analyze large volumes of environmental data decision makers can gain deeper insights and make more informed timely decisions to protect the environment This convergence of technology and environmental science has the potential to revolutionize how we understand and respond to environmental issues making it a critical area of focus for sustainable development and environmental protection efforts **Harnessing AI in Geospatial Technology for Environmental Monitoring and Management**

explores the integration of AI with geospatial technologies to advance environmental monitoring and management practices. It discusses methods, challenges, and emerging technologies in the field. Covering topics such as agriculture, environmental information, and solar energy, this book is an excellent resource for academicians, researchers, professionals, policymakers, government officials, graduate and postgraduate students, and more.

Geospatial Techniques for Managing Environmental Resources Jay Krishna Thakur, Sudhir Kumar Singh, AL Ramanathan, M. Bala Krishna Prasad, Wolfgang Gossel, 2012-03-05

Geospatial Information is spatial data concerning a place or in space collected in real time. Geospatial techniques, together with remote sensing, geographic information science, Global Positioning System (GPS), cartography, geovisualization, and spatial statistics, are being used to capture, store, manipulate, and analyze data to understand complex situations, solve mysteries of the universe. These techniques have been applied in various fields such as meteorology, forestry, environmental management, agriculture, health, homeland security, etc. around the globe. This volume presents case studies and examples from various parts of the world and provides a broad overview of various approaches, data sets, data acquiring, monitoring, and dissemination methods, satellites, and sensors, tools, and techniques used, integrating tools, techniques, and application to various fields for the sustainable management of environmental resources in the context of global environmental change and natural hazards. The objective of this book is to provide state-of-the-art information to academics, researchers, and industry practitioners who are involved or interested in the study, use, design, and development of advanced and emerging geospatial technologies around the world with ultimate aim to empower individuals and organizations in building competencies for exploiting the opportunities of the knowledge society. All the chapters are peer-reviewed and evaluated and are an inter- and multi-disciplinary source of information making an effort to link various geospatial techniques to make the earth an habitable place. The contributors have tried to focus their respective views on the current problems that need urgent attention. Consequently, we see this book as a comprehensive information base which includes work of expertise in their specific fields of research.
