## LAB EXERCISE 5: Lizard Evolution Virtual Lab

Answer the following questions as you finish each module in the virtual lab.

### MODULE 1: Introduction

At the beginning of the virtual lab, you were asked to select eight lizards from a category. What criteria did you use to select your group?

My criteria were: size, color, and shape of the lizards.

Did your teacher grade individual team's efforts?

Yes, my teacher graded our team's efforts. We were given a grade for our team's efforts. We were also given a grade for our team's efforts.

An adaptation is a structure or function that is inherited by a population because it increases the ability to survive and reproduce in a particular environment. Provide one example and an explanation of an adaptation in the desert lizard.

One example of an adaptation is the ability to survive in the desert. The lizards have a thick skin that helps them survive in the desert.

Provide one evolutionary explanation for why lizards living in the desert have different traits (i.e., the group) would have evolved a characteristic.

One evolutionary explanation is that lizards living in the desert have different traits because they have adapted to the environment.
