to intro to art

In this class you will learn how to creatively problem solve and tackle artistic challenges, while learning life long skills such as persistence, reflection, observation, and self critique. As this is an introductory class you will begin the course with learning the basics and tackling new media and more challenging techniques as the year progresses. This course will set you up for a great foundation of skills to help you in higher level courses.

expectations

Be on time

Bring your pencil and sketchbook each day

Help with clean up daily
(even if it's not your mess!)

Mapping Critical Dance Studies in India Urmimala Sarkar Munsif,2024-03-14 This book provides a critical understanding of dance studies in India bringing together various embodied practices identified loosely as dance It suggests an alternative reading of the history of patronage policies and institutionalized understanding of categories such as classical folk modern popular and Bollywood that hierarchizes some dances as more dance than others It is of great interest to scholars looking at performing arts such as dance as a tool for identity assertions It offers diverse possibilities of understanding dance through its inherent sociopolitical possibilities as a participatory or presentational tool for communication The multidisciplinary approach brings together perspectives from critical dance studies anthropology history and gender studies to connect embodied archives of different communities to create an intersectional methodology of studying dance in India as a powerful but marginal expressive art practice Accessible at multiple levels the content is relevant for undergraduate and postgraduate students as well as researchers across dance dance education theatre and performance studies

The Reference Catalogue of Current Literature ,1913 Sources for a Better Education Piet Kommers,2022-02-22 This textbook evolves from the intersection between Research Educational Information Technologies and recent Best Practices It offers diplomacy and erudite rhetoric in order to harvest from innovation projects and see how new professional needs for teachers are emerging day by day The volume launches the compact background for the 21st century education that every teacher faces after being in charge for 3 or 6 years after pre service training Sources for a better education refers to the deep understanding and to the incentives for encouraging teachers to leave the comfort zone and experiment the next steps into a further sophisticated professionalism without the threat of feeling in a Dilemma The first candidate for extending one s teaching effectiveness is to tailor one s teaching to the test to be expected Teaching to the Test is an understandable tactic however it endangers the students full understanding of underlying concepts and analogies

The second candidate for professionalism is the deeper layer of knowledge on how curricular domains are related. In simpler terms, better teachers know how to bridge topics and subjects so that students develop a deeper understanding of the patterns and structure in knowledge. The 21st century education prioritizes higher degrees of flexible, divergent and abstract thinking so that creative problem solving comes into reach. ICT tools for making prior knowledge explicit is a major example on how learners harvest upon prior knowledge, thinking and intuition. The third source for a better education is the courage to envisage one's meta knowledge in order to see patterns in learning and understanding. The more conscious prior knowledge gets decompiled into genetic metaphors, the better future learning can be anticipated. The fourth asset for meta cognitive skills is the wide spectrum of tools that the web offers for building knowledge infra structures so that knowledge becomes transformed into problem solving skills. The availability of knowledge is no longer sufficient for finding creative and authentic solutions in future situations. This is the case for both students and teachers. By tradition, the bottom up strategy from reproductive factual learning up to the levels of problem solving and creative thinking has been favoured. The one click away access to information on the web asks a more strategic attitude from learners and practitioners to cope with the periphery between known and unknown so that a more effective meta cognition develops. The fifth stimulus for more effective learning is the expanding impact of social media. Social media tend to intimidate learners with incomplete understanding to jump on biases as delivered through political and conspiracy agendas. This book aims at the challenge to build upon learners' existential needs and developing interest for a longer term learning perspective.

Renaissance man and philosopher Piet Kommers presents us with an interesting question: What makes education exciting? His book covers a range of lessons learnt through research and practice, covering philosophies and paradoxes ranging from learning to learn to machine learning for learning. In 35 chapters, he takes us on an exciting comprehensive journey of just about every conceivable aspect of technology and education. This is a must have for every 21st Century bookshelf.

By Johannes Cronj, professor of Digital Teaching and Learning in the Department of Information Technology at the Cape Peninsula University of Technology, South Africa. Piet Kommers has in 400 pages provided an overview of teaching based on practical experience. It is not a summary of pedagogic models but a guide to important factors in how to motivate students and thus improve their learning. New technologies change teaching and we need to understand how application of such technologies can improve the learning. This book provides such knowledge and I wish I had it when I started teaching at university many years ago.

By Jan Frick, Professor Business School, University of Stavanger, Norway. Piet Kommers delivers a very thorough book with a holistic perspective on Learning Technologies. This book is a result of many years of experience that the author has in Higher Education. It comprises lessons learned from the author's professional career, including inputs from European Union research projects as well as diversified interactions with a wide range of Peoples and Cultures. The result is a unique perspective that is a must read for anyone interested in Learning Technologies, past, present and future.
