present world **Data Construction and Data Analysis for Survey Research** Raymond Kent, 2020-05-19 Based on the needs of business marketing and social science students this book provides an accessible and easy to follow guide to survey data analysis The book avoids the more usual statistics driven perspective Rather it provides an intuitive feel for handling survey data by emphasising that data analysis is more about understanding the research objectives what kinds of data have been collected how quantitative data were generated by the process of measurement how to create a data matrix and how to transform raw data before thinking about appropriate statistical calculations The author begins by considering what data are the different kinds of data that surveys generate and the tripartite format of all quantitative data The processes of measurement and the errors that may arise are carefully explained Coverage of the creation and analysis of a data matrix using SPSS is then provided The author then reviews what kinds of statistical procedure are required for what kinds of data and for what purposes The book concludes by giving a review of strategies for coping with all the kinds of practical problems that arise in survey research Reader friendly throughout Data Analysis A Guide to Market and Social Research provides numerous worked examples end of chapter questions and points for further discussion to help reinforce concepts learnt A data diskette containing the worked examples in SPSS is also provided in the back of the book Also available is a companion website with extra features to accompany the text please take a look by clicking below <http://www.palgrave.com/business/kent/index.asp> The usefulness of the quantitative method of statistical analysis (SPSS) as a mode of data analysis for research purposes Sunny Kohli, 2011-04-11 Scientific Essay from the year 2011 in the subject Communications Public Relations Advertising Marketing Social Media grade 70% The University of Surrey language English abstract This paper will look to analyse the use of the quantitative method of statistical analysis SPSS as a mode of data analysis for research purposes It will aim to explain what is involved in the SPSS process by giving example to the Research Methods RM class dated 17th November 2010 Fundamentals of Statistical Analysis I which involved the analysis of quantitative data through the use of the SPSS application This will include what the exercise entailed how data was generated for analysis using this method and how the method was executed The discussion will then move on to describe some real life research question data that can be analysed using this method The type of analysis to expect from SPSS will also be discussed A discursive comparison of the SPSS method to the qualitative method of thematic analysis as a data analysis tool will be conducted at end of this paper this will give light to the advantages and hindrances of the SPSS method Babbie et al 2003 explain SPSS as a vehicle for discovering differences and relationships in data they state In many ways SPSS is a vehicle for discovering differences and relationships in data the same way a car is a vehicle for discovering places we have not yet visited we plan the trip and set the directions Similarly when we use SPSS we choose the data we wish to explore and select the statistical procedures we wish to use with SPSS commands These commands instruct SPSS where to find our data ways in which we want to modify the data and the statistical procedures we want to use Babbie et al 2003 37 **Doing Social Research: A Source Book**

Modern Survival Analysis in Clinical Research Ton J. Cleophas, Aeilko H. Zwinderman, 2023-05-29 An important novel menu for Survival Analysis entitled Accelerated Failure Time AFT models has been published by IBM international Business Machines in its SPSS statistical software update of 2023 Unlike the traditional Cox regressions that work with hazards which are the ratio of deaths and non deaths in a sample it works with risk of death which is the proportion of deaths in the same sample The latter approach may provide better sensitivity of testing but has been seldom applied because with computers risks are tricky and hazards because they are odds are fine This was underscored in 1997 by Keiding and colleague statisticians from Copenhagen University who showed better sensitive goodness of fit and null hypothesis tests with AFT than with Cox survival tests So far a controlled study of a representative sample of clinical Kaplan Meier assessments where the sensitivity of Cox regression is systematically tested against that of AFT modeling has not been accomplished This edition is the first textbook and tutorial of AFT modeling both for medical and healthcare students and for professionals Each chapter can be studied as a standalone and using real as well as hypothesized data it tests the performance of the novel methodology against traditional Cox regressions Step by step analyses of over 20 data files stored at Supplementary Files at Springer Interlink are included for self assessment We should add that the

authors are well qualified in their field Professor Zwinderman is past president of the International Society of Biostatistics 2012 2015 and Professor Cleophas is past president of the American College of Angiology 2000 2002 From their expertise they should be able to make adequate selections of modern data analysis methods for the benefit of physicians students and investigators The authors have been working and publishing together for 25 years and their research can be characterized as a continued effort to demonstrate that clinical data analysis is not mathematics but rather a discipline at the interface of biology and mathematics
