Manual Industrial Workers:

Manual of Industrial Nutrition United States. War Food Administration. Office of Distribution, 1943 From Manual Workers to Wage Laborers Robert Castel, 2017-07-05 In this monumental book sociologist Robert Castel reconstructs the history of what he calls the social question or the ways in which both labor and social welfare have been organized from the Middle Ages onward to contemporary industrial society Throughout the author identifies two constants bearing directly on the question of who is entitled to relief and who can be excluded the degree of embeddedness in any given community and the ability to work Along this dual axis the author locates virtually the entire history of social welfare in early modern and contemporary Europe This work is a systematic defense of the meaningfulness of the category of the social written in the tradition of Foucault Durkheim and Marx Castel imaginatively builds on Durkheim's insight into the essentially social basis of work and welfare Castel populates his sociological framework with vivid characterizations of the transient lives of the disaffiliated those colorful itinerants whose very existence proved such a threat to the social fabric of early modern Europe Not surprisingly he discovers that the cruel and punitive measures often directed against these marginal figures are deeply implicated in the techniques and institutions of power and social control The author also treats the flipside of the problem of social assistance namely matters of work and wage labor Castel brilliantly reveals how the seemingly objective line of demarcation between able bodied beggars those who are capable of work but who chose not to do so and those who are truly disabled becomes stretched in modernity to make room for the category of the working poor It is the novel crisis posed by those masses of population who are unable to maintain themselves by their labor alone that most deeply challenges modern societies and forges recognizably modern policies of social assistance The author's gloss on the social question also offers us valuable perspectives on contempo **The Manual of Industrial Safety** Sidney James Williams, 1927 Manual to Accompany Vocations in Industry May Rogers Lane, 1929 Monthly Labor Review United States. Bureau of Labor Statistics, 1955 Publishes in depth articles on labor subjects current labor statistics information about current labor contracts and book reviews **Class and Gender** Yao Tang, 2016-02-29 During China's socio economic transition period stretching from 1978 to the present day the nation's social structure underwent enormous changes The economic restructuring from a centrally planned economy to a market oriented one combined with the retreat of the state administrative sphere from the labour market gradually transformed the mechanisms of resource allocation This has given rise to enlarging gaps between different social groups which have led to an escalation in tensions between the higher and the lower social strata In addition the situation of Chinese women has also changed with those in contemporary China in a quite different position from their pre communist traditional counterparts Over recent decades more equalitarian policies have made a great deal of difference not only to women's self identification but also to their social milieu However the female employment rate has gradually declined since the economic reforms began meaning this period has had a major impact on the social status and conditions of

Chinese women These social transformations and differences between the genders have provided an unusual opportunity for scholars and researchers who are interested in social change As such this book examines the social structure of contemporary China exploring how resources are distributed among the different social strata and how these strata have transformed with the economic reforms and development In addition it also investigates the current socio economic circumstances of Chinese women especially since many female workers were laid off xiagang by state owned enterprises SOEs and collectively owned enterprises COEs during the industrial restructuring In confronting an ever more competitive market environment has the situation of women degraded or progressed Do all women face a similar situation or are there discrepancies that exist amongst them What are the factors contributing to these divisions In discussing these questions this book allows readers to obtain a comprehensive understanding of the current Chinese social structure and how it has transformed as well as its influence on gender differentiation

Manual Training and Vocational Education Charles Alpheus Bennett,William Thomas Bawden,1907 Interwar Unemployment in International Perspective Barry J. Eichengreen,T.J. Hatton,2012-12-06 High unemployment has been one of the most disturbing features of the economy of the 1980s For a precedent one must look to the interwar period and in particular to the Great Depression of the 1930s It follows that recent years have been marked by a resurgence of interest amongst academics in interwar unemployment The debate has been contentious There is nothing like the analysis of a period which recorded rates of unemployment approaching 25 per cent to highlight the differences between competing schools of thought on the operation of labour markets Along with historians economists whose objective is to better understand the causes character and consequences of contemporary unemployment and sociologists seeking to understand contemporary society s perceptions and responses to joblessness have devoted increasing attention to this historical episode Like many issues in economic history this one can be approached in a variety of ways using different theoretical approaches tools of analysis and levels of disaggregation Much of the recent literature on the functioning of labour markets in the Depression has been macroeconomic in nature and has been limited to individual countries Debates from the period itself have been revived and new questions stimulated by modern research have been opened Many such studies have been narrowly focused and have failed to take into account the array of historical evidence collected and analysed by contemporaries or reconstructed and reinterpreted by historians
