

Chapter 33: Assessment of the Cardiovascular System

MULTIPLE CHOICE

1. A nurse assesses a client who had a myocardial infarction and is hypotensive. Which additional assessment finding should the nurse expect?
- Heart rate of 120 beats/min
 - Cool, clammy skin
 - Oxygen saturation of 90%
 - Respiratory rate of 8 breaths/min

ANS: A

When a client experiences hypotension, baroreceptors in the aortic arch sense a pressure decrease in the vessels. The parasympathetic system responds by lessening the inhibitory effect on the sinoatrial node. This results in an increase in heart rate and respiratory rate. This tachycardia is an early response and is seen even when blood pressure is not critically low. An increased heart rate and respiratory rate will compensate for the low blood pressure and maintain oxygen saturations and perfusion. The client may not be able to compensate for long, and decreased oxygenation and cool, clammy skin will occur later.

2. A nurse assesses a client after administering a prescribed beta blocker. Which assessment should the nurse expect to find?
- Blood pressure increased from 98/42 mm Hg to 132/60 mm Hg
 - Respiratory rate decreased from 25 breaths/min to 14 breaths/min
 - Oxygen saturation increased from 88% to 96%
 - Pulse decreased from 100 beats/min to 80 beats/min

ANS: D

Beta blockers block the stimulation of beta1-adrenergic receptors. They block the sympathetic (fight-or-flight) response and decrease the heart rate (HR). The beta blocker will decrease HR and blood pressure, increasing ventricular filling time. It usually does not have effects on beta2-adrenergic receptor sites. Cardiac output will drop because of decreased HR.

International Electronics Directory '90 C. G. Wedgwood,2013-10-22 International Electronics Directory 90 Third Edition The Guide to European Manufacturers Agents and Applications Part 1 comprises a directory of various manufacturers in Europe and a directory of agents in Europe This book contains a classified directory of electronic products and services where both manufacturers and agents are listed This edition is organized into two sections Section 1 provides details of manufacturers including number of employees production program names of managers as well as links with other companies The entries are listed alphabetically on a country by country basis Section 2 provides information concerning agents or representatives including names of manufacturers represented names of managers number of employees and range of products handled A number of these companies are also active in manufacturing and so appear in both Section 1 and Section 2 This book is a valuable resource for private consumers **Seeds** Carol C. Baskin,Jerry M. Baskin,2014-02-20 The new edition of Seeds contains new information on many topics discussed in the first edition such as fruit seed heteromorphism breaking of physical dormancy and effects of inbreeding depression on germination New topics have been added to each chapter including dichotomous keys to types of seeds and kinds of dormancy a hierarchical dormancy classification system role of seed banks in restoration of plant communities and seed germination in relation to parental effects pollen competition local adaption climate change and karrikinolide in smoke from burning plants The database for the world biogeography of seed dormancy has been expanded from 3 580 to about 13 600 species New insights are presented on seed dormancy and germination ecology of species with specialized life cycles or habitat requirements such as orchids parasitic aquatics and halophytes Information from various fields of science has been combined with seed dormancy data to increase our understanding of the evolutionary phylogenetic origins and relationships of the various kinds of seed dormancy and nondormancy and the conditions under which each may have evolved This comprehensive synthesis of information on the ecology biogeography and evolution of seeds provides a thorough overview of whole seed biology that will facilitate and help focus research efforts Most wide ranging and thorough account of whole seed dormancy available Contains information on dormancy and germination of more than 14 000 species from all the continents even the two angiosperm species native to the Antarctica continent Includes a taxonomic index so researchers can quickly find information on their study organism s

and Provides a dichotomous key for the kinds of seed dormancy Topics range from fossil evidence of seed dormancy to molecular biology of seed dormancy Much attention is given to the evolution of kinds of seed dormancy Includes chapters on the basics of how to do seed dormancy studies on special groups of plants for example orchids parasites aquatics halophytes and one chapter devoted to soil seed banks Contains a revised up dated classification scheme of seed dormancy including a formula for each kind of dormancy Detailed attention is given to physiological dormancy the most common kind of dormancy on earth *International Encyclopedia of Education* ,2009-04-17 The field of education has experienced extraordinary technological societal and institutional change in recent years making it one of the most fascinating yet complex fields of study in social science Unequalled in its combination of authoritative scholarship and comprehensive coverage International Encyclopedia of Education Third Edition succeeds two highly successful previous editions 1985 1994 in aiming to encapsulate research in this vibrant field for the twenty first century reader Under development for five years this work encompasses over 1 000 articles across 24 individual areas of coverage and is expected to become the dominant resource in the field Education is a multidisciplinary and international field drawing on a wide range of social sciences and humanities disciplines and this new edition comprehensively matches this diversity The diverse background and multidisciplinary subject coverage of the Editorial Board ensure a balanced and objective academic framework with 1 500 contributors representing over 100 countries capturing a complete portrait of this evolving field A totally new work revamped with a wholly new editorial board structure and brand new list of meta sections and articles Developed by an international panel of editors and authors drawn from senior academia Web enhanced with supplementary multimedia audio and video files hotlinked to relevant references and sources for further study Incorporates ca 1 350 articles with timely coverage of such topics as technology and learning demography and social change globalization and adult learning to name a few Offers two content delivery options print and online the latter of which provides anytime anywhere access for multiple users and superior search functionality via ScienceDirect as well as multimedia content including audio and video files Mathematical and Physical Simulation of the Properties of Hot Rolled Products Maciej Pietrzyk,L. Cser,J.G. Lenard,1999-07-05 The objective of this publication is to comprehensively discuss the possibilities of producing steels with pre determined attributes demanded by the customer to fit exacting specifications The information presented in the book has been designed to indicate the reasons for the expenses and to aid in the process of overcoming the difficulties and reducing the costs In nine detailed chapters the authors cover topics including steel as a major contributor to the economic wealth of a country in terms of its capabilities and production current concerns of major steel producers phenomena contributing to the quality of the product information concerning the boundary conditions of the rolling process and initial conditions put to use by mathematical models the solid state incremental approach and flow formulation parameters and variables most of which make use of the exponential nature of phenomena that are activated by thermal energy the application of three dimensional analysis to shape rolling the

evaluation of parameters by a form of inverse analysis to the flat rolling process knowledge based modeling using artificial intelligence expert systems and neural networks They conclude that when either mathematical or physical modeling of the rolling process is considered and the aim is to satisfy the demands for customers it is possible to produce what the customer wants exactly Stock Guide ,1995-07 Monthly statistical summary of 5100 stocks **Applying evidence-based concepts**
