Affect and Emotion in Human-Computer Interaction Christian Peter, Russell Beale, 2008-08-25 Affect and emotion play an important role in our everyday lives They are present whatever we do wherever we are and wherever we go without us being aware of them for much of the time When it comes to interaction be it with humans technology or humans via technology we suddenly become more aware of emotion either by seeing the other s emotional expression or by not getting an emotional response while anticipating one Given this it seems only sensible to explore affect and emotion in human computer interaction to investigate the underlying principles to study the role they play to develop methods to quantify them and to finally build applications that make use of them This is the research field for which over ten years ago Rosalind Picard coined the phrase affective computing The present book provides an account of the latest work on a variety of aspects related to affect and emotion in human technology interaction It covers theoretical issues user experience and design aspects as well as sensing issues and reports on a number of affective applications that have been developed in recent years

Emotional Design and the Healthcare Environment Marco Maria Maiocchi, Zhabiz Shafieyoun, 2022-05-16 For all of the tremendous advances in medicine and treatment the world has seen in the modern era the human body s ability to heal itself remains a literally vital and often overlooked facet of healthcare Through the use of emotional design aimed at transforming healthcare environments such as waiting rooms in such a way as to boost the emotional wellbeing of patients and thus their general attitudes including in regard to their own healing processes medical institutions can improve outcomes for the people they treat while simultaneously lowering overall costs Design as an inherently transdisciplinary problem solving activity is well suited to this task And when combined with a field of study such as neuroscience which can literally map out the perceptions that lead to the experience of particular emotions healthcare environments can be transformed into spaces through such innovations as Kansei engineering that then subsequently transform the people who rely on them the most leading to more
