Teaching to the Math Common Core State Standards F. D. Rivera, 2015-06-17 This is a methods book for preservice middle level majors and beginning middle school teachers It takes a very practical approach to learning to teach middle school mathematics in an emerging Age of the Common Core State Standards The Common Core State Standards in Mathematics CCSSM is not meant to be the official mathematics curriculum it was purposefully developed primarily to provide clear learning expectations of mathematics content that are appropriate at every grade level and to help prepare all students to be ready for college and the workplace A quick glance at the Table of Contents in this book indicates a serious engagement with the recommended mathematics underlying the Grade 5 through Grade 8 and traditional pathway Algebra I portions of the CCSSM first with issues in content practice assessment learning teaching and classroom management pursued next and in that order In this book we explore what it means to teach to the CCSSM within an alignment mindset involving content practice learning teaching and assessment The Common Core state content standards which pertain to mathematical knowledge skills and applications have been carefully crafted so that they are teachable learnable coherent fewer clearer and higher The practice standards which refer to institutionally valued mathematical actions processes and habits have been conceptualized in ways that will hopefully encourage all middle school students to engage with the content standards more deeply than merely acquiring mathematical knowledge by rote and imitation Thus in the CCSSM proficiency in content alone is not sufficient and so does practice without content which is limited Content and practice are both equally important and thus must come together in teaching learning and assessment in order to support authentic mathematical understanding This blended multisourced text is a getting smart book It prepares preservice middle level majors and beginning middle school teachers to work within the realities of accountable pedagogy and to develop a proactive disposition that is capable of supporting all middle school students in order for them to experience growth in mathematical understanding that is necessary for high school and beyond including future careers

Purposeful curriculum design is essential to attaining consistent academic improvement. Educators often find, however, that a viable curriculum based on mandated standards can be exceedingly challenging to create, implement, and sustain. In this book, curriculum consultant Elaine Makas provides a step-by-step guide to establishing the processes and documents necessary to build a stable, cohesive curriculum system that aligns to educational benchmarks. Based on the DAILY model (Data Alignment, Instructional Pace, Guides, Local Common Assessment, and Yearly Review), this system deconstructs the curriculum process into sequential steps that facilitate the development of instructional priorities, reveal students in need of intervention, and help ensure continuous process improvement. With numerous templates, samples, and reflective exercises, this book clearly demonstrates how to collect and analyze data, identify expectations, and recognize learning gaps. Develop curriculum maps that align with standards and grade-level subject goals. Pace instruction throughout the year according to specific objectives. Create assessments that predict standardized test performance. Conduct yearly improvement reviews and documentation revisions. An essential resource for all schools or districts, whether struggling or successful, *From Mandate to Achievement* enables K-12 principals, district administrators, curriculum facilitators, and teacher teams to establish a consistent and accurate curriculum process that increases academic achievement and drives continuous school improvement.
