The Digital Frontier Sangeet Kumar, 2021-05-25 The global web and its digital ecosystem can be seen as tools of emancipation communication and spreading knowledge or as means of control fueled by capitalism surveillance and geopolitics The Digital Frontier interrogates the world wide web and the digital ecosystem it has spawned to reveal how their conventions protocols standards and algorithmic regulations represent a novel form of global power Sangeet Kumar shows the operation of this power through the web's infrastructures of control visible at sites where the universalizing imperatives of the web run up against local values norms and cultures These include how the idea of the global common good is used as a ruse by digital oligopolies to expand their private enclosures how seemingly collaborative spaces can simultaneously be exclusionary as they regulate legitimate knowledge how selfhood is being redefined online along Eurocentric ideals and how the web's political challenge is felt differentially by sovereign nation states In analyzing this new modality of cultural power in the global digital ecosystem The Digital Frontier is an important read for

scholars activists academics and students inspired by the utopian dream of a truly representative global digital network
