Syngellakis,2016-12-12 Comprising a selection of articles dedicated to disaster management this volume focuses on the challenges arising from extreme natural phenomena and descriptions of methods for assessing their occurrence probability and of measures for mitigating their intensity and

detrimental effects The first group of articles describes general strategies for risk assessment and mitigation providing examples in the context of various kinds of natural disasters The economic impact of mitigation measures communities differing coping capabilities human attitudes towards relocation and possible links to climate change are among the topics considered Natural strategies are outlined in the contexts of Turkey Brazil and United Arab Emirates The second part of the book is concerned with disasters from specific natural causes starting with a group of ten articles on floods The corresponding contributions address flood frequency vulnerability and resilience of communities response of small and medium enterprises risk in terms of financial losses private investment participation to mitigation measures assessment of design solutions against flood hazard sleeper dykes as a means of reducing risk preparedness of hospitals causes of highway flooding and their relative importance and impact of floods on poor communities The third set of articles are related to earthquake related hazards describing in particular an analysis tool providing integrated risk coping capacity and management output a method for assessing vulnerability considering key contributing factors a technique for urban aftershock management and damage assessment and neural network modelling to estimate tsunami damage Finally a group of three articles address issues related to landslides namely slope management as a means of reducing risk and losses early warning based on rainfall data and hazard prediction using favourability function modelling and spatial target mapping software Providing a unique global perspective this volume focuses on recent developments over a wide range of topics that cannot be found in similar currently available publications in this field This is a valuable addition to the relevant literature available to researchers and engineers working on risk assessment and mitigation of natural disaster intensity and consequences It will appeal of those working in academic and research environments as well as governmental professional national and international organisations

Teaching International Law ,2023-12-18 Teaching International Law is a topic of great importance in international law academia In the past renowned international lawyers and research institutions have dealt with this matter This book brings together a larger number of established international lawyers who not only present the state of the art of this discipline but also their own vision and perspective Traditionally teachers of international law had considerable influence on the development and the understanding of this subject The international legal system has profoundly changed but in time of enormous challenges for the survival of mankind the voice of the teachers should again be heard

Risk Analysis IX C. A. Brebbia,2014-06-04 Containing papers presented at the 9th International Conference on Computer Simulation in Risk Analysis and Hazard Mitigation this book covers a series of important topics of current research interests and many practical applications It is concerned with all aspects of risk management and hazard mitigation associated with both natural and anthropogenic hazards The analysis and management of risk and the mitigation of hazards is of fundamental importance to planners and researchers around the world We live in an increasingly complex society with the potential for disasters on a worldwide scale Natural hazards such as floods earthquakes landslides fires and others have

always affected human societies Man made hazards however played a comparatively small role a few centuries ago until the risk of catastrophic events started to increase due to the rapid growth of new technologies The interaction of natural and anthropogenic risks adds to the complexity of the problem Topics covered include Risk assessment Risk management Hazard prevention management and control Early warning systems Risk mapping Natural hazards Disaster management Vulnerability assessment Health risk Debris flow and flood hazards Case studies Climate change Safety and security Evacuation simulation and design Political and economic vulnerability

Statistical Methods for Food Science John A. Bower, 2013-06-21 The recording and analysis of food data are becoming increasingly sophisticated Consequently the food scientist in industry or at study faces the task of using and understanding statistical methods Statistics is often viewed as a difficult subject and is often avoided because of its complexity and a lack of specific application to the requirements of food science This situation is changing there is now much material on multivariate applications for the more advanced reader but a case exists for a univariate approach aimed at the non statistician This second edition of Statistical Methods for Food Science provides a source text on accessible statistical procedures for the food scientist and is aimed at professionals and students in food laboratories where analytical instrumental and sensory data are gathered and require some form of summary and analysis before interpretation It is suitable for the food analyst the sensory scientist and the product developer and others who work in food related disciplines involving consumer survey investigations will also find many sections of use There is an emphasis on a hands on approach and worked examples using computer software packages and the minimum of mathematical formulae are included The book is based on the experience and practice of a scientist engaged for many years in research and teaching of analytical and sensory food science at undergraduate and post graduate level This revised and updated second edition is accompanied by a new companion website giving the reader access to the datasets and Excel spreadsheets featured in the book Check it out now by visiting www.wiley.com/go/bower/statistical or by scanning the QR code below
