Measurement of the Sustainability Performance of Chemical Manufacturing Processes Mohammad Hossein Ordouei, 2024-06-24. The present book introduces the Composite Sustainability Indicator (CSI) defining sustainability as meeting present needs without compromising future generations. The CSI integrates the Waste Reduction Algorithm, risk assessment models, and energy intensity indices to evaluate environmental impacts and facilitate risk-informed design. Through case studies, the author demonstrates the effectiveness of these methodologies, aggregating them into a Key Process Indicator for sustainability analysis. The book covers chapters on computer-aided modelling, heterogeneous catalytic reactions, pollution prevention, and global warming. Notably, it delves into energy impacts, risk assessment methodologies, and the CSI's application in complex processes such as refineries. Leveraging advanced process simulators like Aspen Plus and HYSYS alongside WAR GUI, the author designs processes and estimates risks and environmental impacts. This guide aims to equip process systems engineers with tools to design environmentally conscious and sustainable chemical processes using high-quality raw data endorsed by EPA. Strategic products like sustainable gasoline blends are studied as case studies.

Annual accountability hearing with the Nursing and Midwifery Council Great Britain: Parliament: House of Commons: Health Committee, 2011-07-26. The Health Committee reports on the annual accountability hearings with the General Medical Council (GMC) HC 1429 and Nursing and Midwifery Council (NMC) HC 1428. The reports call for doctors and nurses to develop a wider responsibility for the overall quality of care delivered to

patients and they have an obligation as professionals to report to their professional body any concerns they have about the quality of care being delivered by their colleagues The GMC and the NMC must give a strong lead in this area and ensure that failure to act on this responsibility is regarded as a serious breach of professional obligation The Committee stresses that both regulators need to have effective revalidation processes in place so that they can periodically check on how doctors and nurses are performing The Committee recognises that the NMC is making steady progress towards being an effective regulator but cautions that there remains substantial ground to cover before it can be considered fully effective work around pro active regulation risk based visits must be expanded guidance about the care of older people must be reinforced by an action plan to deliver improved outcomes in this group Government and both regulators must speed up efforts to resolve the serious problems posed by doctors and nurses who qualify elsewhere in Europe and earn the right to work in the UK without having their language or medical skills tested The UK and European law that underpins the workings of both regulators needs a complete overhaul
