

2 - Introduction

2.1 Description

More than ever before, today's advanced electronic equipment, with complex integrated circuits and other sensitive electronics, needs a stable and continuous AC power supply to operate correctly. While the power coming from the wall outlet is often unreliable, a GE Digital Energy™ LP-U UPS provides the security of completely uninterrupted power.

A compact, truly on-line system, the LP-U UPS protects your equipment from all forms of power interference, including complete power failure. A simple and elegant circuit design, together with extensive protection against abnormal operating conditions (e.g. overload, short circuit, overheating), makes the UPS exceptionally reliable.

The UPS offers complete galvanic isolation of input and output, also when operating in bypass mode. As a result, input and output voltages do not necessarily have to be equal, making the UPS suitable for almost every situation.

All units are standard equipped with a backfeed protection relay.

2.2 Warranty

GE Digital Energy, operating through its authorized agents, warrants that the standard products will be free of defects in materials and workmanship for a period of 24 months (12 months for the battery) after the date of invoice, or such other period as may be specified.

NOTE: This warranty does not cover failures of the product which result from incorrect installation, misuse, alterations by persons other than authorized agents, or abnormal operating conditions.
