Distributed Systems George F. Coulouris, Jean Dollimore, Tim Kindberg, 2005 Up to date coverage of the latest development in this fast moving area including the debate between components and web services as the way for the industry to go increased emphasis on security and the arrival of ubiquitous computing in the form of among other things The Grid

Research Anthology on Big Data Analytics, Architectures, and Applications Management Association, Information Resources, 2021-09-24 Society is now completely driven by data with many industries relying on data to conduct business or basic functions within the organization With the efficiencies that big data bring to all institutions data is continuously being collected and analyzed However data sets may be too complex for traditional data processing and therefore different strategies must evolve to solve the issue The field of big data works as a valuable tool for many different industries The Research Anthology on Big Data Analytics Architectures and Applications is a complete reference source on big data analytics that offers the latest innovative architectures and frameworks and explores a variety of applications within various industries Offering an international perspective the applications discussed within this anthology feature global representation Covering topics such as advertising curricula driven supply chain and smart cities this research anthology is ideal for data scientists data analysts computer engineers software engineers technologists government officials managers CEOs professors graduate students researchers and academicians

Concise Guide to the Internet of Things Michael McCarthy, Barry Burd, Ian Pollock, 2025-01-20 Traditional products are becoming smart products and smart products are becoming connected From smart homes to smart cities to smart farms this trend in product design and development is likely to accelerate and will have a profound impact on the future This accessible textbook reference focuses on using the Internet of Things IoT to foster sustainability It guides readers in a step by step manner through the creation of example applications designed to promote a clean and healthy environment Additionally the book serves as a lesson in systems design taking the view that the IoT is best understood as an extension of the World Wide Web Therefore the exposition examines how the Web was designed and how its principles can be applied to IoT design The book engages readers with modern IoT technologies standards and platforms It connects sensors and actuators to the cloud but in a way that is based on sound architectural principles Topics and features Combines principles of computer science with hands on exercises and programming Includes the Particle Photon 2 microcontroller and uses Node js and Node RED Covers cryptocurrencies machine learning and identification technologies Examines sensing and actuation using The Photon 2 and MQTT Leverages large language models in exercises The IoT has countless applications making this textbook reference appealing to a wide variety of readers In particular those pursuing or interested in computer science internet technologies product design city planning sensor networks or software design will find the book intriguing and useful Dr Barry Burd is a Professor at Drew University Mr Michael McCarthy is an Associate Teaching Professor at Carnegie Mellon University and Mr Ian Pollock is an Associate

Professor at California State University East Bay *Intelligence in Communication Systems* Finn Arve Aagesen, Chutiporn Anutariya, Vilas Wuwongse, 2004-11-03 The 2004 IFIP International Conference on Intelligence in Communication Systems INTELLCOMM2004 held in Bangkok Thailand 23-26 November 2004 was the successor and an expansion of SMARTNET a series of annual conferences on intelligence in networks held during 1995-2003 under the auspices of IFIP TC6's Working Group 6.7 The Internet and Web provide more connection facilities hence the man-machine and machine-machine interactions will increase and communication will have an important role in modern systems. In order to obtain effective and efficient communication artistic social and technical issues have to be tackled in a holistic and integrated manner. However communication techniques concepts and solutions which have been developed so far treat these issues separately so that there arises a need for communication researchers and practitioners in different fields engineering science and arts to meet share their experience and explore all possibilities of developing integrated and advanced solutions which incorporate ideas from such disciplines as communication arts art design linguistics Web technologies computer system architecture and protocols computer science and artificial intelligence. INTELLCOMM 2004 was jointly sponsored by IFIP WG 6.7 Smart Networks and WG 6.4 Internet Applications Engineering and aimed to provide an international forum which brings academia researchers practitioners and service providers together. The discussion areas covered the latest research topics and advanced technological solutions in the area of intelligence in communication systems ranging from architectures for adaptable networks services and Semantic Web Web service technologies to intelligent service application interface and intelligent human interaction. INTELLCOMM 2004 received 112 paper submissions from 28 countries. From these 24 were accepted and are included in this proceedings. There were also 3 papers accepted for poster presentation published separately.

Cooperating Embedded Systems and Wireless Sensor Networks Michel Banatre, Pedro Jose Marron, Anibal Ollero, Adam Wolisz, 2010-01-05 A number of different system concepts have become apparent in the broader context of embedded systems over the past few years. Whilst there are some differences between these this book argues that in fact there is much they share in common particularly the important notions of control heterogeneity wireless communication dynamics ad hoc nature and cost. The first part of the book covers cooperating object applications and the currently available application scenarios such as control and automation healthcare and security and surveillance. The second part discusses paradigms for algorithms and interactions. The third part covers various types of vertical system functions including data aggregation resource management and time synchronization. The fourth part outlines system architecture and programming models outlining all currently available architectural models and middleware approaches that can be used to abstract the complexity of cooperating object technology. Finally the book concludes with a discussion of the trends guiding current research and gives suggestions as to possible future developments and how various shortcomings in the technology can be overcome.

Kickstart Blockchain and Cryptography Fundamentals Prof. Veerendra Kumar Jain, 2024-09-12 Master Blockchain Cryptography and Smart Contracts

KEY FEATURES Delves into core blockchain concepts from cryptographic foundations to enterprise applications Covers cutting edge topics like smart contracts Hyperledger and blockchain interoperability providing a future focused perspective Real world examples of how blockchain can transform industries like finance healthcare and supply chain management

DESCRIPTION Unlock the true potential of blockchain technology with this essential guide crafted for students and professionals looking to stay ahead in the fast evolving digital landscape Beginning with the foundations of Blockchain the book moves on to explain the basics of decentralized distributed ledgers that secure digital assets You will then explore the role of Cryptographic Hash Functions CHF in safeguarding blockchain transactions through fixed length hash values Next you will discover applications of Blockchain in Cryptocurrency and how digital assets like Bitcoin operate without central authorities The book also covers Distributed Consensus in Open and Closed Environments showing how blockchain ensures uniform agreement among nodes without a central server You will then explore how blockchain is transforming industries by enabling secure peer to peer transactions The book introduces Hyperledger and Smart Contracts highlighting how these tools automate and secure agreements without intermediaries Finally you will learn about facilitating communication between different blockchain networks through Blockchain Interoperability and Legal and Environmental Aspects examining the legal and environmental challenges blockchain faces This book is not just a resource it s your roadmap to mastering blockchain technology and revolutionizing your business

WHAT WILL YOU LEARN Learn how cryptographic hash functions transform data into fixed length values and their role in blockchain security Explore how cryptocurrencies like Bitcoin leverage blockchain technology for digital asset management Understand how consensus mechanisms validate transactions and maintain ledgers in open blockchain networks Discover how blockchain secures data transfers and eliminates intermediaries in enterprise settings Examine blockchain use cases in enterprises such as cross border payments and supply chain management Learn about Hyperledger Fabric and smart contracts focusing on automating and securing transactions in permissioned blockchains Transform blockchain networks to achieve communication through interoperability Overcome the legal and environmental challenges of cryptocurrencies and blockchain technology and achieve sustainability

WHO IS THIS BOOK FOR This book is tailored for undergraduates in Computer Science IT and MCA programs as well as professionals and individuals in related fields It assumes a foundational understanding of blockchain technology and cryptography making it ideal for those seeking to deepen their knowledge in these areas

TABLE OF CONTENTS

- 1 Overview of Blockchain Technology
- 2 Cryptographic Hash Function
- 3 Understanding Blockchain with Cryptocurrency
