Second Thoughts Armand de Mestral, 2017-01-30 Criticism Doubts Second thoughts Although investor state arbitration ISA has been included in investment agreements between developed and developing countries since the 1960s and provided foreign investors with a kind of private justice against developing world host states it became increasingly controversial in developed countries when it was included in NAFTA in 1993 creating the possibility of ISA claims between and against two developed countries the United States or Canada as well as claims against and by a developing state Mexico A few years later the OECD's attempt to finalize the Multilateral Agreement on Investment was stymied by concerted civil society protest and opposition to ISA and in recent years each new proposed agreement has sparked fresh rounds of protest What engenders the controversy about ISA While ISA's advantage is that it prevents escalation of international conflict by relieving states from feeling obliged to espouse claims of injured investors against foreign governments it is criticized for creating regulatory chill whereby states are reluctant to make necessary public policy reforms for fear that changes to the investment environment will lead to expensive investor claims Are fears of litigation and expensive payouts well founded Can key modifications to the ISA system such as those added to the Comprehensive Economic and Trade Agreement satisfy critics and redeem this system of private justice Is ISA really necessary between developed democracies where an independent and professional judiciary can generally be trusted to decide without fear or favour In *Second Thoughts Investor State Arbitration between Developed Democracies* 16 international investment legal experts have undertaken in depth analyses of ISA's economic political and social impacts when included in agreements between developed democracies This timely volume appears at a critical moment seeking answers to the crucial questions that will determine the next generation of international investment agreements

The Universal Timekeepers David J. Helfand, 2023-09-19 Runner up 2024 Columbia University Press Distinguished Book Award Atoms are unfathomably tiny It takes fifteen million trillion of them to make up a single poppy seed give or take a few billion And there's hardly anything to them atoms are more than 99 9999999999 percent empty space Yet scientists have learned to count these slivers of near nothingness with precision and to peer into their internal states In looking so closely we have learned that atoms because of their inimitable signatures and imperturbable internal clocks are little archives holding the secrets of the past David J Helfand reconstructs the history of the universe back to its first microsecond 13.8 billion years ago with the help of atoms He shows how by using detectors and reactors microscopes and telescopes we can decode the tales these infinitesimal particles tell answering questions such as Is a medieval illustrated prayer book real or forged How did maize cultivation spread from the highlands of central Mexico to New England What was Earth's climate like before humans emerged Where can we find clues to identify the culprit in the demise of the dinosaurs When did our planet and solar system form Can we trace the births of atoms in the cores of massive stars or even glimpse the

origins of the universe itself A lively and inviting introduction to the building blocks of everything we know The Universal Timekeepers demonstrates the power of science to unveil the mysteries of unreachably remote times and places *Unity*, 1913
