

Living Things

All living things need food. Food gives living things energy. Animals get food by eating other living things (*plants or animals*) and plants get food by making it using the sun, air, soil and water. Living things have waste and get rid of it. All living things move, plants move by growing. A plant's leaves grow toward the light and their roots grow beneath the soil. Animals move in different ways, some fly, some float, some walk. All living things grow, babies grow, a seed grows, trees grow.

1. What does food provide living things with?
2. How do plants get food?
3. How does a plant move?
