Managing Health, Safety and Well-Being Aditya Jain, Stavroula Leka, Gerard I.J.M. Zwetsloot, 2018-04-11. To achieve sustainable progress in workplace and societal functioning and development, it is essential to align perspectives for the management of health, safety and well-being. Employers are responsible for providing every individual with a working environment that is safe and does not harm their physical or mental health. However, the current state of the art indicates that approaches used to promote health, safety and well-being have not had the anticipated results. At the level of the enterprise, it is widely understood and accepted by all stakeholders that employers share the responsibility of promoting and managing the health of their workers. Evidence indicates that most employers put in place procedures and measures to manage workers' health and create healthy workplaces to meet legal requirements as a response to requests by employees as a need to improve company image, reputation and to improve productivity. This highlights that, in addition to legal requirements, the key drivers for companies also include the ethical and business case. While much has been written about the role of legislation and the business case for

promoting health safety and well being not much is known about the ethical case for promoting employment and working conditions In this context this book examines the potential of the link between responsible and sustainable workplace practices human rights and worker health safety and well being and explores how complementary approaches can be used to promote employment and working conditions and sustainability at the organizational level It offers a framework for aligning different approaches and perspectives to the promotion of workers health safety and well being and provides recommendations for introducing such an approach at the enterprise level *Health and Safety Law 5e* Jeremy

Stranks,2010-04-08 The estimated annual cost to society of health and safety failure is 18bn The Government has recently set out targets for the first time which aim to reduce the impact of these failures by 30% over the next ten years The last decade has seen significant changes in the approach to health and safety legislation It is no longer just dangerous industries for which regulation is vital The rise in service sector industries has meant an increase in employees being exposed to risks such as musculo skeletal injury and stress related illnesses At a time when both public and private sector organisations are becoming ever more aware of the importance of promoting positive public images and enjoying good standing among stakeholders safety specialists are keen to persuade managers to take a more comprehensive view of how health and safety can contribute to wider business objectives It is no longer enough just complying with the minimum requirements of the law
